Copy Survey and Import Data

Alchemer gives you the tools to **Copy** your survey and to use the **Data Import Tool** to import the original survey's data into the copy. This can be accomplished by using the following features:

- Export Raw Data to Excel
- Copy a Survey
- Import Data into Your Survey

Follow these steps to copy a survey and bring over the data:

1. Export Data

Access the survey that you wish to copy and export the survey data via the CSV/Export option. Click on Results > Exports and select CSV/Excel. Once you have run your export in Alchemer, download it as a CSV file.

Exports					
E	Easily export your responses for use in external systems or databases.	CSV / Excel Customize which data you export	Bulk PDF Create a PDF of each individual response	SPSS Export Export to the statistical analysis program SPSS	

2. Copy your Survey

Navigate to your home page and copy your survey. There are a couple of options for copying your survey.

3. Import Data into Copy

Now that you have copied your original survey, you will need to access the copy and navigate to **Tools > Import Data**. You will be using the Data Import Tool to upload the CSV/Excel file that you downloaded in Step 1 into the copied survey.

Review the Data Import Supported Question Types here.

Choose your file's CSV delimiter and select your file (this is the file that you downloaded in **Step 1**). Click **Upload Data**

Import Data		
CSV delimiter	, comma	~
Select a CSV file to import	Select file	
		Upload Data

Click on **Suggest Matches** - this will allow Alchemer to try to match up your file's column headers with the available questions in your copied survey.

mport Data		
Map Fields		Suggest Matches
Associate the fields from your upload on the left to questions	s from your project on the right	-
	s from your project on the right Survey Questions	
Associate the fields from your upload on the left to questions		•

Review the matches and manually match up any questions that the tool was not able to automatically. Click **Preview and Import**. Last, click **Upload Data**.

You are all done! Your copied survey should now contain the data that was downloaded from the original survey - giving you two versions of the survey with data.
