

Importing Surveys From Other Survey Platforms

We do not have a tool to import a survey directly from another survey tool into Alchemer. You can, however quickly rebuild your surveys by cutting and pasting your questions and answers into Alchemer. Learn how to [Create a Survey in Alchemer](#).

Import Response Data

If you have response data from other surveys that you wish to have available for reporting in Alchemer you can use our data import tool to import your existing response data (from a spreadsheet) into your new Alchemer surveys.

The data import tool is available for paid plans only.
