

Section Navigator Action

The Section Navigator action allows you to group your survey into sections to make it easy for different respondents to complete different parts without interrupting one another! Using the Page Group settings to group your pages you can then use section navigator to have multiple people complete sections of the same survey response!

Survey Sections: Click **Answer** to begin a section.

Section	Status	Actions
Healthcare	Not Started	Answer
Finance	Not Started	Answer
Contact Information *	Not Started	Answer

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

Say you need to query every district in your state, but each district needs to provide you with information from three different departments. You can use the section navigator to have multiple respondents fill out a particular section of the survey without being interrupted by the others and without having to navigate through pages not relevant to them!

Step 1: Set Up Your Page Groups

To get started you will be adding Page Groups to *each page* in your survey. The unique page groups are what display in the Section Navigator as sections. The same page group can be assigned to multiple pages in order to group them together.

As a best practice, we recommend that all pages in your survey are added to a group*. If you have a need for ungrouped pages, make sure that these are between page groups or after all page groups when using Section Navigator. An ungrouped page should not be in between pages that are part of the same group.

*There is one exception to this rule. The page that contains the Section Navigator Action (usually the first page in your survey) should not be added to a Page Group. This can cause issues during survey taking.

1. To get started adding page groups click the pencil icon above a page and go to the **Logic** tab.
2. Under **Page Group** select Create a New Group. Enter the Page Group Name of your choice in the text field that appears. When you create a new Page Group, the page will automatically be assigned to it. Remember to click **Save Page**. If you wish to assign a page to an existing Page Group, select it and save.
3. **(Optional) Treat this page as optional when calculating if a page group has been answered completed** - For any pages that you'd like to set as optional, select this option and the page will not be required when evaluating response completion.

The screenshot shows the 'Edit Page' interface with a dark blue header. The header contains the title 'Edit Page' and navigation tabs: 'Page', 'Logic', 'Layout', and 'Repeat'. A 'Need Help?' link with a heart icon is on the right. Below the header, there are two text input fields: 'Page Title' and 'Page Description'. Underneath these are three sections of settings, each with radio button options: 'Disable Page' (Yes/No, with 'No' selected), 'Admin-Only Page' (Yes/No, with 'No' selected), and 'Override response status when this page is reached' (Default: don't override/Change response status to 'Partial', with 'Default: don't override' selected). At the bottom, there are three buttons: 'Save Page to Library', 'Never Mind', and 'Save Page'.

About Page Groups

- As you create new Page Groups, they will populate the Page Group list on other pages.
- Page Groups must be manually assigned on each page.
- Unchecking the Page Group on all pages removes it from the Section Nav list, but it will not remove the page group name from being listed in the Logic tab when editing a page.
- Each page can only be assigned to one Page Group.
- Page grouping does not show up in Reports or Exports.

Step 2: Set Up Your Section Navigator

Now that you have your Page Groups set up, it's time to create your Section Navigator action.

1. Click **Add Action** on the page where you would like to add your Section Navigator. You can place this on any page, but we recommend the first or the last page (or both!).
2. Select **Section Navigator** and give it a title (this is displayed to respondents).
3. Select **Include** next to the page groups you would like to include in the section navigator.
4. **(Optional)** You can also make these sections required by selecting the checkbox in the

Edit Action
Primary Setup Logic

What question do you want to ask?

Survey Navigation

Section Groups

This section navigation action will control the following groups.

Tip: It's usually best to setup this action after you have created your page groups.

Page Group	Include	Require
Healthcare	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Finance	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Contact Information	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Require column.

5. Customize the other settings as needed:

(Optional) Show Status

Show Status

Showing status displays if a section has been started, completed and or approved next to each page group.

Yes, show completion status next to each page group.

If you have this option turned on it will display one of the following statuses of the page group in the section navigator as respondents complete sections:

- **Not Started:** No one has begun answering the section yet
- **Answered:** Someone has started the grouped section but has not yet finished it. OR Someone has finished the section, but the questions were not required
- **Finished:** All required questions are answered
- **Complete:** All questions in the grouped section have been answered

(Optional) Allow Assignment

The 'From Email' address must be either noreply@Alchemer.com or another email address associated with your DKIM domain. Using an email address without [DKIM verification in Alchemer](#) will lead to bounced emails.

Check Yes, allow forwarding of sections to other people , to allow the main respondent to forward

sections of the survey to other individuals via email. Fill out the **Email Information** fields below to set up the email message that is sent when a section is forwarded. Review the Forwarding Email Merge Codes section of this tutorial for information about how to display dynamic information in the email message.

Allow Assignment

Allow the main respondent to forward sections of the survey to another individual via email.

Yes, allow forwarding of sections to other people.

Please click on the following link and answer the sections provided for you."/>

Thank you message

Next Page

This option allows you to choose which page you'd like the respondent to go to after they finish their group section.

Next Page

Which page would you like this action to jump to, once the page groups it shows are finished?

Forwarding Email Merge Codes

Inside of the Section Navigator action, if you decide to allow forwarding of sections to other people, you'll notice that the email message has a few merge codes. These codes will dynamically populate with the information described below when the email is sent.

- **[question("from_name")]**: This will pull information from the "Your Email" field that will appear inside your Survey's Section Navigator when someone clicks on "Assign checked sections to someone else via email" button.
- **[question("section_name")]**: This will pull the title of the Page Group Section your respondent is forwarding to their colleague.

- `[survey("title")]`: This will pull the title of the survey your Section Navigator is on.
- `[question("sectionnav_link")]`: This merge code will provide a unique link to the email recipient so they can pick up where they need to inside of the survey.

These merge codes will not work outside of this email action (except for `[survey("title")]` which is a global merge code).

What does it look like for respondents?

Respondents will see the following screen if you have the section navigator on your first page. Otherwise, they will see it once they reach the page with the section navigator.

Survey Sections: Click **Answer** to begin a section.

Section	Status	Actions	Invite Colleague to Complete
Healthcare	Not Started	Answer	<input type="text" value="Email Address"/> <input type="button" value="Send"/>
Finance	Not Started	Answer	<input type="text" value="Email Address"/> <input type="button" value="Send"/>
Contact Information *	Not Started	Answer	<input type="text" value="Email Address"/> <input type="button" value="Send"/>

What does the email that is sent to the invitee look like?

Dear Mary,

Crystal would like your help filling out the "Page Groups" Survey.

Please click on the following link and answer the sections provided for you.

http://www.surveymizmo.com/s3/1056438/Page-Groups/?__sgassist=e977c2df933dc5efcfacedda1b88abe9&snc=1350329787_507c65bb7a6cb8.80154189&__sgtarget=1

Thank you!

The email that is sent via the "Invite Colleague to Complete" is very simple and will provide the following information unless you customized it further.

FAQ

- ⊕ I copied my survey, will the Section Navigator action work?
- ⊕ Does the Section Navigator show up in Reports and Exports?
- ⊕ Can I invite multiple respondents to take different sections of the survey at the same time?
- ⊕ Can I use Preview or the Test tab to test?
- ⊕ I'm testing both admin and assistant functionality and it is not working, what gives?

Compatibility

We discourage the use of the following in combination with the Section Navigator:

- [Question Repeating](#) or [Page Repeating](#)
- Placing the Section Navigator action on a [page with logic](#)
- Section Navigator Actions are not compatible with the [Question Library](#)

As a best practice, we recommend that all pages in your survey are added to a group*. If you have a need for ungrouped pages, make sure that these are between page groups or after all page groups when using Section Navigator. An ungrouped page should not be in between pages that are part of the same group.

*There is one exception to this rule. The page that contains the Section Navigator Action (usually the first page in your survey) should not be added to a Page Group. This can cause issues during survey taking.
