Radio Button Grid: Only Allow One Selection

Radio Button Grid questions allow a single selection per row. Some customers have requested the ability to allow only a single selection for the entire grid. While we don't have a built-in way to achieve this, you can set this up pretty easily with a little JavaScript.

> Check it out in an example survey!

OR

> Download this survey to your account!

The Script

To set this up start by adding a JavaScript Action to the same page as your Radio Button Grid question and copy and paste the below JavaScript.

```
$radios = $('.countme :radio');
$radios.on('change',function(){
   $radios.not(this).prop('checked',false);
});
```

Then, just edit your Radio Button Grid, go to the **Layout** tab and enter countme into the **CSS Class Name** field.

CSS Class Name:

countme

Finally, click **Save Question** and test it out!

> ## Scripting and Other Custom Solutions
>
> We're always happy to help you debug any documented script that is used as is. That said, we do not have the resources to write scripts on demand or to debug a customized script.
>
> If you have customization ideas that you haven't figured out how to tackle, we're happy to be

a sounding board for SurveyGizmo features and functionality ideas that might meet your needs. Beyond this, check out our Professional Services; these folks have the scripting chops to help you to achieve what you are looking for!
