

Use Signature Question Later in Survey

This script will allow you to use a signature question's input later in a survey.

Check it out in an example survey!

OR

Add a survey with this setup to your account!

Setup

First set up your signature question. On a following page that you want your Signature Image to show up click **Add New Action > Custom Script** and paste the following script in that field.

```
signatureID = 2 --update with the ID to your signature question

data = getquestionruntimeproperty(signatureID,'Data')
dataAtoms = data['atoms']
signature = dataAtoms[0]['raw_value']['signature']
base64d = base64decode(signature)

signature = ' '

print(signature)
```

Required Customizations

SignatureID - The highlighted 2 will need to be changed to the question ID of your signature question. To learn more about how to find the question ID check out our tutorial on [Finding IDs](#).
