

Net Promoter Score® Question Type

Net Promoter® measures the loyalty between a provider and consumers.

NPS® questions are typically phrased like so: "Based on your experience, how likely are you to recommend Alchemer to a friend or colleague?"

1. Based on your most recent experiences using the platform, how likely are you to recommend this software to a friend?

0 1 2 3 4 5 6 7 8 9 10

Submit

Check it out in an [example survey!](#)
[Add a survey](#) with this question to your account!

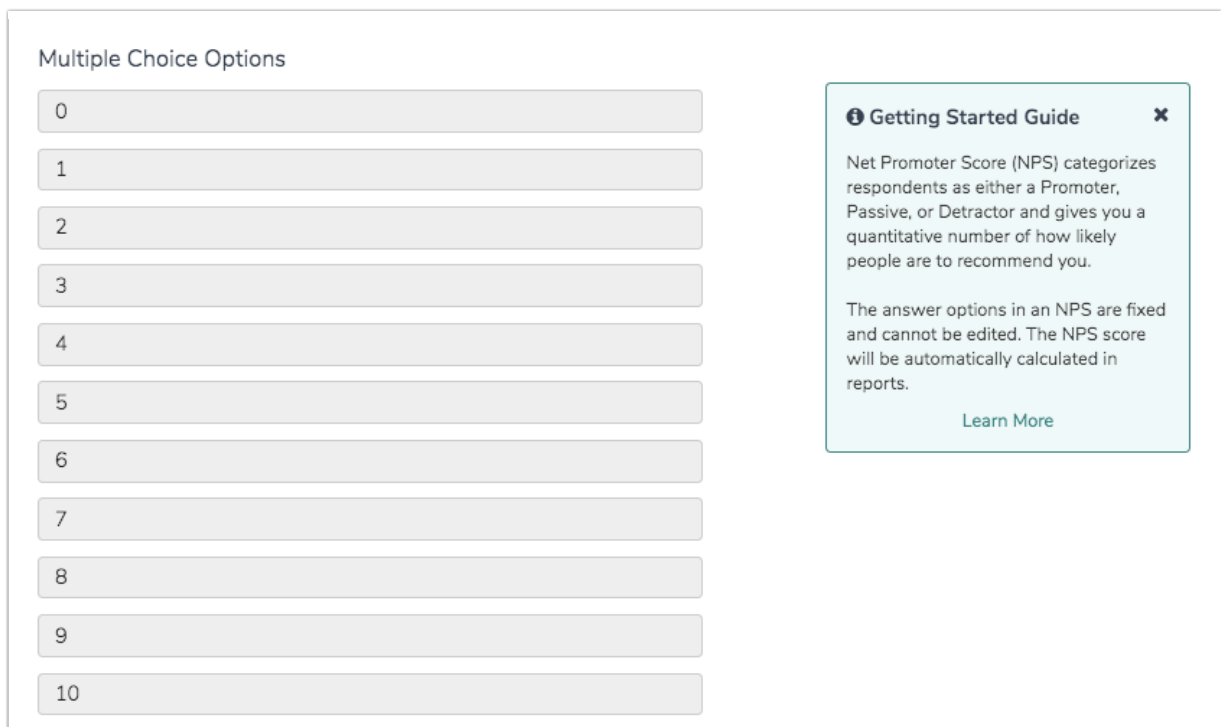

Respondents respond on a scale from 0 to 10. Typically, the reporting value is numeric for analysis purposes.

When to use it

Use Net Promoter Score® questions to gauge your customers' loyalty.

Setup

1. Click the **Question** link on the page where you would like to add your NPS® question.
2. Select **Net Promoter Score** from the **Question Type** dropdown and enter the question you wish to ask.
3. This will add answer options 0-10. You'll notice that these options are greyed out; this is because they cannot be changed. This is so that the question can report properly.

Getting Started Guide ✕

Net Promoter Score (NPS) categorizes respondents as either a Promoter, Passive, or Detractor and gives you a quantitative number of how likely people are to recommend you.

The answer options in an NPS are fixed and cannot be edited. The NPS score will be automatically calculated in reports.

[Learn More](#)

4. Below the answer options, we recommend adding a **Far Left Label** and **Far Right Label** and click **Save Question**.

Alchemer **strongly** recommends extensive testing of the labels display on mobile devices before launching the survey live. Long labels can cause issues with display on mobile devices.

Best Practice Tip: Adding a Follow-up Essay Question

Net Promoter Score questions should always be paired with an open text field to collect details on why the respondent choose their score. Otherwise, how are you going to improve your score?

1. Based on your most recent experiences using the platform, how likely are you to recommend this software to a friend?

0 1 2 3 4 5 6 7 8 9 10

Of course, you'll need to read and act on this feedback once you start collecting it. Check out our [Open Text Analysis](#) and [Response Tagging](#) tools to help you with this!

Survey Taking

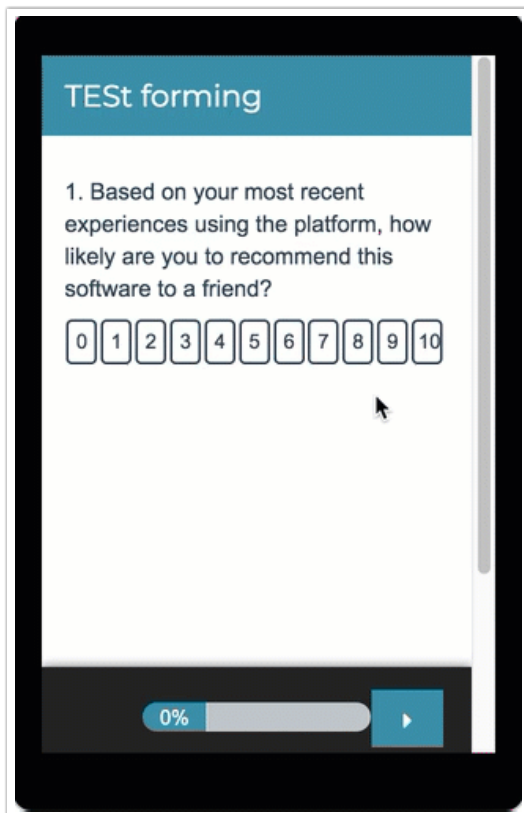

On a desktop and most laptops the Net Promoter Score® question type looks like so.

1. Based on your most recent experiences using the platform, how likely are you to recommend this software to a friend?

0 1 2 3 4 5 6 7 8 9 10

When optimized for mobile devices the Net Promoter Score® question type looks very similar but with larger targets as mobile respondents will be using their finger to select answers.

By default, survey questions show one at a time on mobile devices to prevent the need for scrolling on smaller screens. For single-select questions, like the Net Promoter Score® question, the screen will automatically advance after an option is selected. You can turn off this [one-at-a-time interaction](#) if you wish.

TEST forming

1. Based on your most recent experiences using the platform, how likely are you to recommend this software to a friend?

0 1 2 3 4 5 6 7 8 9 10

0%

The image shows a mobile-optimized version of the Net Promoter Score question. The question text is centered and reads: "1. Based on your most recent experiences using the platform, how likely are you to recommend this software to a friend?". Below the question is a horizontal row of 11 numbered buttons (0-10) for selection. At the bottom of the screen, there is a progress indicator showing "0%" and a blue "Next" button with a right-pointing arrow.

Reporting

In reports responses are categorized as either promoters (9-10), neutrals (7-8) or detractors (0-6). A Net Promoter Score is calculated as the percent of promoters minus the percent of detractors.

Additional Reporting Options

There are a couple of other options for reporting on your NPS® question:

- If you want to see the specific value selected (0-10) for each individual respondent, use the [DIY Response Grid/Cards](#) reporting element.

Change Colors and Categories in Reports

Within a Standard Report your NPS® questions will use the [Group Answer Options](#) feature to group Detractors, Passives, and Promoters.

Using this feature, you can update the colors for your NPS® reporting element, should you prefer something other than Alchemer's defaults. To do so, click on each category's color selector to choose a different color for representing that category in your report.

Answer Grouping / Top and Bottom Box

Group Answer Options

■	Detractors	7 Items
■	Passives	2 Items
■	Promoters	2 Items

If you wish to change the category name this can be done using the Text and Translations tool. Go to **Tools > Text and Translations** and click the language for which you wish to change the NPS® categories. Go to the **Reports** tab and scroll to the **Detractors**, **Passives**, and **Promoters**. Click **Edit** to change the category name.
