All Time 👻	

While you can dismiss this notification via the x in the upper right, there are a few helpful options available here that can be big time-savers.

Add filter to exclude test data

A This report contains both test data and real data. For an accurate report add filter to exclude test data.	×
Q1 Customer Report	 ✓ Overall Options ⊞ Bulk Edit Elements

Click this option and a filter will be applied to your Standard Report to only include **Complete**, **Partial**, and **Disqualified** responses. You can adjust or remove this filter if needed.

Delete all test responses

Click this option to delete only the test responses from your survey. You will see a pop-up window where you can confirm this action via the **Delete test data** button.

Note: The test responses will be deleted from the **survey**, rather than just the report that you are working in. **This action is not reversible**.

Mark all test responses as real

▲ This report contains both test data and real data. For an accurate report, add filter to exclude test data. You may also delete all test responses o mark all test responses as real.	×
Q1 Customer Report	Overall Options Bulk Edit Elements

Click here to convert all test responses in your survey into real responses. You will see a pop-up window where you can confirm this action via the **Mark as real** button.

Note: This will affect all test responses within your **survey**, not only the report that you are working in. **This action is not reversible**.
