CSS Snippets

CSS snippets are available for globally changing interactions across an entire survey, solution, or workflow.

Snippets are added to the **Style Tab** by selecting via the top toolbar **Style > HTML/CSS Editor (lower right of page) > Custom CSS Tab** and pasting the snippet in the **CSS tab** to apply these to an entire survey.

Snippet	Description
Mobile	Apply styles specifically to mobile or desktop view.

Mobile - Apply styles specifically to mobile or desktop view

```
.sg-mobile-optimized .my-class {
  /* styling for mobile view of .my-class */
}
```

```
html:not(.sg-mobile-optimized) .my-class {
  /* styling for desktop view of .my-class */
}
```
