

# Show a Random Number of Rows in a Radio Button Grid or Checkbox Grid question

## Scripting Solutions

Additional scripting solutions will be added in the future. Please reach out to Alchemer with comments and suggestions on solutions you'd like to see via the link [here](#).

## Scripting and Other Custom Solutions

We're always happy to help you debug any documented script that is used as is. That said, we do not have the resources to write scripts on demand or to debug a customized script.

If you have customization ideas that you haven't figured out how to tackle, we're happy to be a sounding board for Alchemer features and functionality ideas that might meet your needs. Beyond this, check out our [Professional Services](#); these folks have the scripting chops to help you to achieve what you are looking for!

## Goal

Show a Random Number of Rows in a Radio Button Grid or Checkbox Grid question.

Effort: ✓ ✓ ✓

## Solution

**Step 1** Add a Radio Button Grid or Checkbox Grid question to the page.

**Step 2** Add a **Hidden Value Action** to the same page with the title **save-randomly-shown-rows**. Leave the hidden value blank. This is used to save the list of rows that are shown so the same list will be shown if the respondent returns to this page.

**Step 3** Set Style > Layout > Mobile Interaction to **Standard**.

**Step 4** Add a new **Javascript Action** with the code below and set the highlighted values.

**Optional Step 5: Require the question** Set **Require this question** and set **if answered, minimum rows required** to the number of rows you set to show in the script.

**Optional Step 6: Hide the page until rows are hidden** When the page is

displayed to the user it will briefly show all options in the grid question until the Javascript code determines the random rows to show and hide. To hide the page until the Javascript completes:

1. Set the Page > Layout > CSS Class Name to **hide-page**
2. Add the following to Style tab > HTML/CSS Editor (lower right of page) > Custom CSS:

```
.hide-page {  
    visibility: hidden;  
}
```

Javascript Action code:

```
/* Alchemer v01  
  
Show random X radio button / checkbox grid rows  
  
Documentation and updates: https://help.alchemer.com/help/show-random-x-grid-rows  
*/  
  
const NUM_TO_SHOW = 2 // how many options to show  
const GRID_QID = 12 // question ID of the grid question  
const SAVE_SHOWN_QID = 9 // question ID of the Hidden Value Action used to save which rows are shown  
  
// * * * * * * * * * * * * *  
// * no changes needed below *  
// * * * * * * * * * * * * *
