Alchemer Release Notes: December 8th, 2020

Below is this week's log of fixes and improvements:

Improvements

[Upgrade] – Improved logging around SMS and Email campaign exceptions.

[Performance] – Fix implemented where shared reports were not using the date filter for open text questions.

Fixes

[Performance] – Removed character limit for privacy message from Text and Translations page, which was preventing all fields from being updated.

[Performance] – Fixed issue where transferred survey projects were being assigned to the oldest team on an account.

[Performance] – Fixed issue where Including a Salesforce Action column in a CSV/Excel export caused a blank export file to be pulled.

[Performance] – Fixed issue for EU and CA datacenter accounts where users were unable to change languages during survey taking via the language bar.

[Performance] – Implemented a fix for the select all checkbox on the project list page so that all options are selected when the checkbox is clicked.

[Performance] – performance enhancement to survey taking.
