Alchemer Release Notes: December 16, 2021

Below is this week's log of fixes and improvements:

Improvements

[Update] – Removed legacy branding from share link previews to reflect Alchemer.

[Update] – The Alchemer platform now displays the API Hostname **via Security > API Access** from the Lefthand navigation menu so users are able to more simply create API calls.

Fixes

[Fix] – Email actions with a blank email body will now send and fire as expected.

[Fix] – Adding a merge code as an answer option within a questions option title field before the initial question save now functions as expected.

[Fix] – Conjoint Question Types now display all configured fields during survey taking based on what has been customized in the builder view.
