Alchemer Release Notes: March 21, 2023

Alchemer Survey

Improvements

[Update] – When configuring a Slack action, if you leave "Bot Name" empty, a default Bot Name of "Alchemer" will now be used used in the sent message and shown in the survey builder and action log.

Alchemer Workflow

Improvements

[Update] – The edit pencil has been removed from the More Options menu on each step type.

[Update] – Updating the survey selection on a Survey step will now prompt the user to publish a new workflow version.

[Update] – Copied, templated, and transferred surveys will not retain the workflow links from the original survey.

[Update] – For administrators, when attempting to use an integration step that you don't have access to, clicking "Contact Us" will open a form to get in touch with the Alchemer team.

Fixes

[Fix] – Fixed an issue where "Send Email To" override value in the Test Tab was impacting real Alchemer Workflow runs.

[Fix] – Fixed an issue where testing Alchemer Workflow settings impacted real workflow runs.

[Fix] – Fixed an issue where if you reset changes when editing a workflow it caused the workflow to disappear from the "Workflows Connected" message in a connected survey.

Alchemer Mobile

Improvements

[Update] – Alchemer Survey and Alchemer Workflow customers can now request more information on Alchemer Mobile directly through the Alchemer platform on the navigation bar.
