Android UI Cookbook Design 2

This design is created in a generic “ ***banking app***” style.

Overview

Helpful Links

Check out our Android UI Cookbook Overview page for more designs

Check the Setting all the styles section at the bottom for all the code together for this design!

The code for all 3 cookbook designs can also be found within the example app styles file.

Note about WCAG / ADA Accessibility Compliance

Alchemer's default UI theme for Android and iOS SDK 6.0 and above is WCAG 2.0 AA and WCAG 2.1 compliant. Alchemer cannot guarantee compliance for customized UI themes. If you customize any UI elements in our iOS SDK 6.0 and above, please use https://webaim.org/resources/contrastchecker/ to confirm that your text colors, selector colors, and icon colors meet or exceed WCAG 2.0 AA and WCAG 2.1 minimum contrast levels.

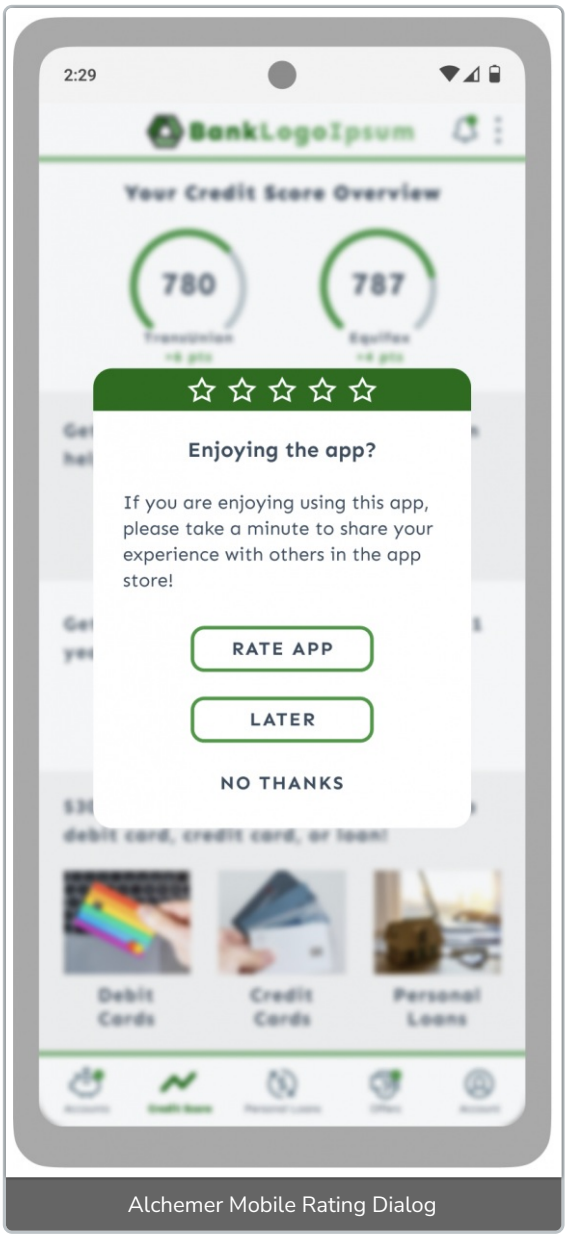

Notice

All interaction designs are possible starting from 6.0.0

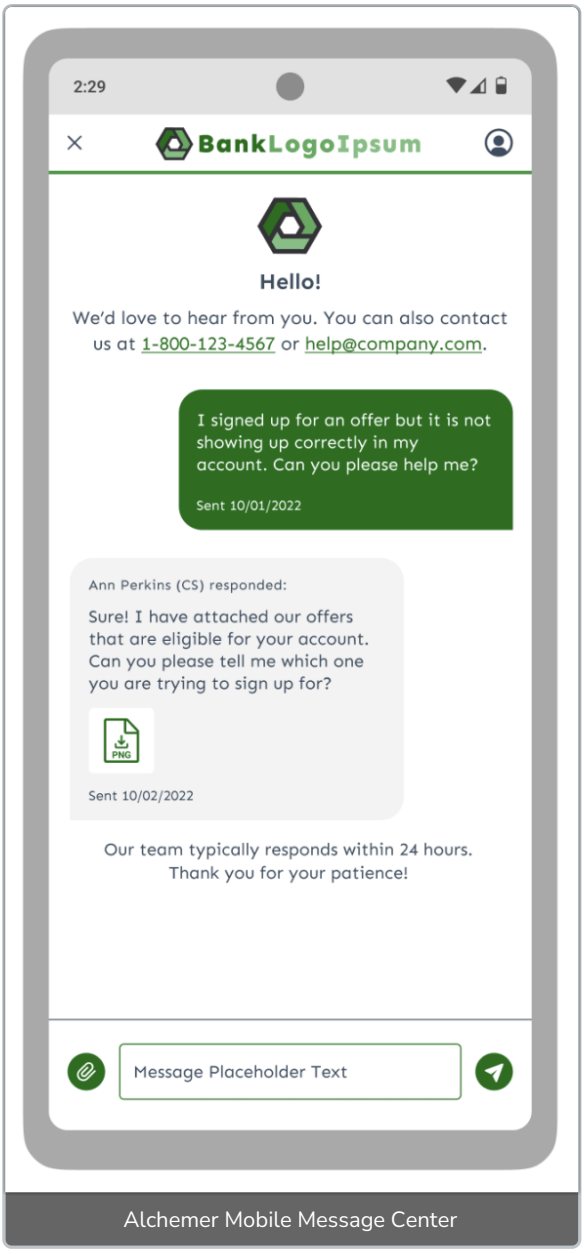

We do not cover both Light and Dark themes within this article.

Design 2

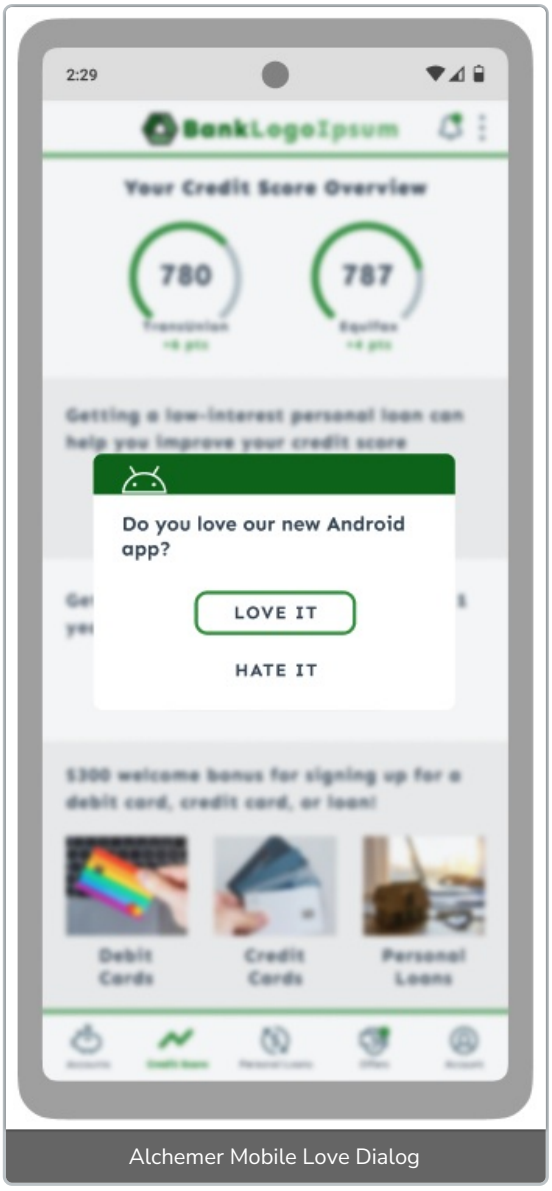

This design is created in a generic “ ***banking app***” style.

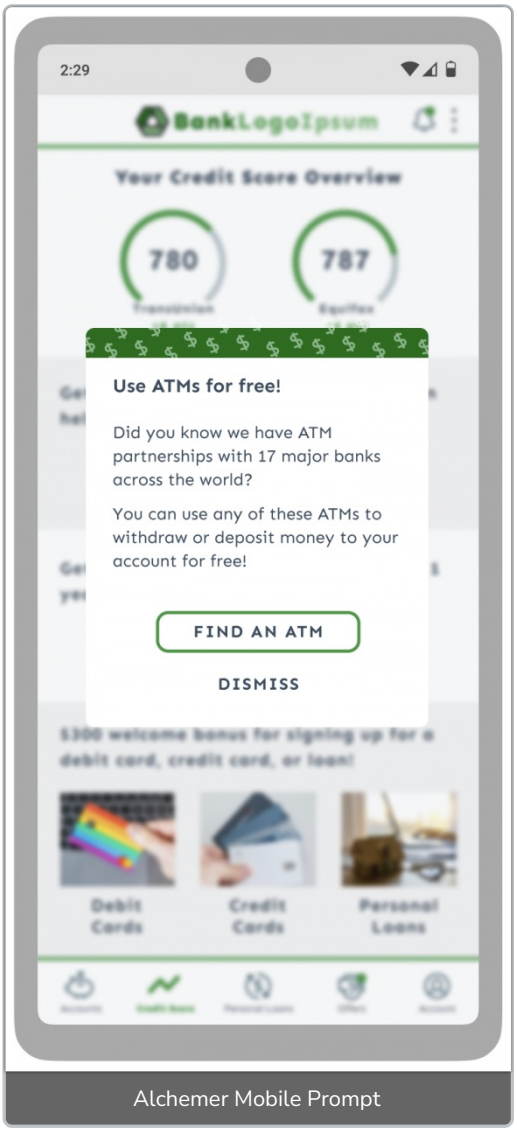

Alchemer Mobile Rating Dialog

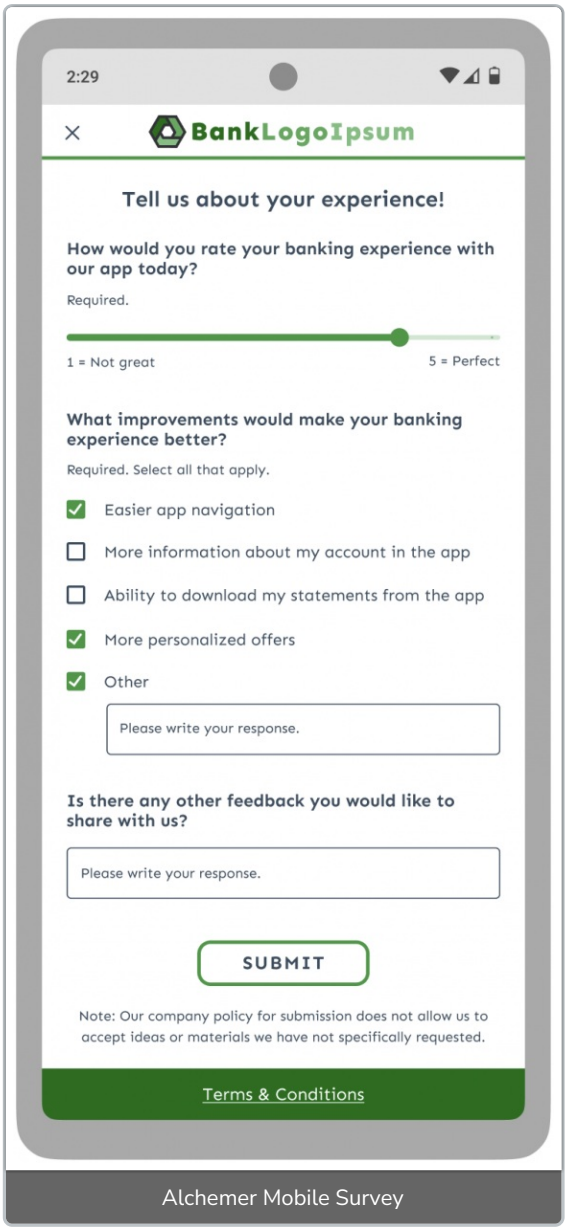

Alchemer Mobile Message Center

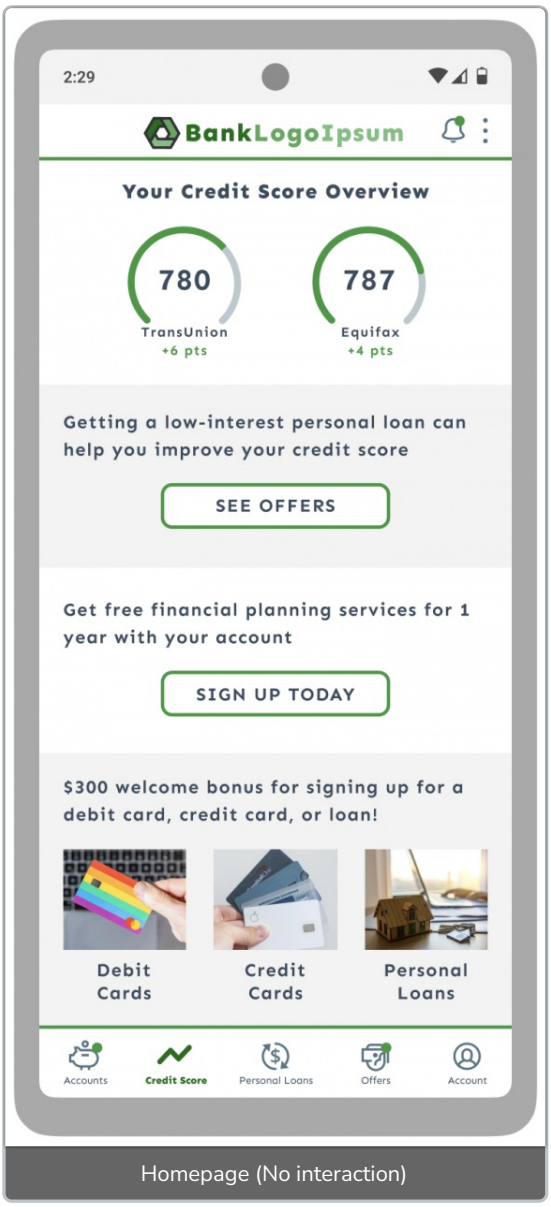

Alchemer Mobile Love Dialog

Alchemer Mobile Prompt

Alchemer Mobile Survey

Homepage (No interaction)

This design highlights custom UI configurations like:

- All Interactions
  - Outline buttons with rounded corners
- Love Dialog
  - Header image
  - Vertical buttons
- Prompt (formerly Notes)
  - Header image
- Survey
  - Custom toolbar background
  - Small header within the toolbar
  - Footer text
- Alchemer Mobile Rating Dialog
  - Header image

- Alchemer MobileMessage Center
    - Header Image
    - Toolbar separator line

Implementation

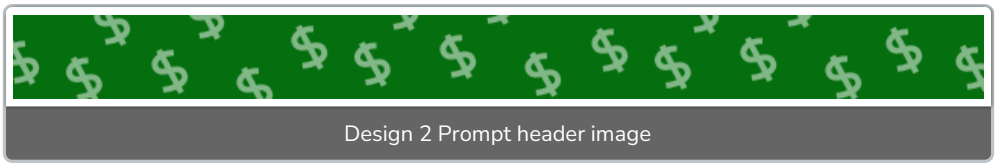

Files

This section will provide the files used within interactions as well as the styles that are shared between multiple interactions.

Header images

Used in: Love Dialog, Prompt, and Alchemer Mobile Rating Dialog.

We named these `cookbook_2_love_dialog_header`, `cookbook_2_note_header`, and `cookbook_2_rating_dialog_header`. You'll see them referenced within the code blocks for the Love Dialog, Prompt, and Rating Dialog.

Design 2 Prompt header image

Design 2 Alchemer Mobile Rating Dialog header image

Design 2 Love Dialog header image

Survey toolbar background

Used in: Survey

This allows us to give the toolbar a divider line between the toolbar and the survey screen. We named this one `cookbook_2_survey_toolbar_background.xml` and you'll see it referenced within the code block for the survey toolbar.

```
<?xml version="1.0" encoding="utf-8"?>

<layer-list xmlns:android="http://schemas.android.com/apk/res/android">

   <item>
      <shape android:shape="rectangle">
         <solid android:color="?colorPrimary" />
      </shape>
   </item>

   <item
      android:bottom="3dp">
      <shape android:shape="rectangle">
         <solid android:color="?android:colorBackground" />
      </shape>
   </item>

</layer-list>
```

Survey toolbar header image (small)

Used in: Survey

Adding a small header image to a survey is possible in multiple ways. We can use a PNG, but vectors (SVG) are more versatile, customizable, and scalable, so they're recommended.

We named this one `cookbook_2_survey_header.xml` and you'll see it referenced within the code block for the survey small header image

> You can add an SVG / PNG to your app by:
>
> * Navigate to res -> drawable
> * Right-click the `drawable` folder
> * Hover over **New**
> * Select **Vector Asset**
> * Find your SVG or PSD file and upload

```
<vector xmlns:android="http://schemas.android.com/apk/res/android"
   android:width="241dp"
   android:height="33dp"
   android:viewportWidth="241"
   android:viewportHeight="33">

```

Shared Styles

Important styles

The most important thing to do is to define the main style colors and font. You can define these within your app's theme for app-wide usage of them, or within `ApptentiveThemeOverride` for just Alchemer Mobile interactions usage.

> We are following Material Theme guidelines for color styling
>
> Read more about what items are used where within the Alchemer Mobile Interface Customization article.

The sen font is from Google Fonts

```
<style name="ApptentiveThemeOverride">
  <!-- All Interactions -->
  <item name="apptentiveFontFamilyDefault">@font/sen</item>
  <item name="colorSecondary">#34993E</item>
  <item name="apptentiveHeaderAlpha">1</item>
  <item name="apptentiveSubheaderAlpha">.8</item>
  <item name="apptentiveTextSizeDefault">15sp</item>

  <!-- Dialogs -->
  <item name="colorSurface">#FFFFFF</item>
  <item name="colorOnSurface">#3A4C5F</item>

  <!-- Survey -->
  <item name="colorPrimary">#056E0F</item>
  <item name="colorOnPrimary">#FFFFFF</item>
  <item name="android:colorBackground">#FFFFFF</item>
  <item name="colorOnBackground">#3A4C5F</item>

  <item name="android:statusBarColor">#FFFFFF</item>
  <item name="android:windowLightStatusBar" tools:ignore="NewApi">true</item>
</style>
```

Button style

Used in: Love Dialog, Prompt, Survey, Survey (close dialog), and Alchemer Mobile Rating Dialog

Inherit from Alchemer Mobile styles to remove a lot of the boilerplate!

Here we can leverage having a common style all buttons can inherit from.

```
<style name="Cookbook2.Button" parent="Widget.MaterialComponents.Button.OutlinedButton">
  <item name="android:paddingTop">10dp</item>
  <item name="android:paddingBottom">10dp</item>
  <item name="android:layout_weight">1</item>
  <item name="android:fontFamily">@font/sen</item>
  <item name="android:textColor">?colorOnSurface</item>
  <item name="android:textSize">15sp</item>
  <item name="android:textStyle">bold</item>
  <item name="android:minWidth">192dp</item>
  <item name="cornerRadius">10dp</item>
  <item name="strokeColor">?colorSecondary</item>
  <item name="strokeWidth">3dp</item>
</style>
```

Dialog layouts

Used in: Love Dialog, Prompt, and Survey (close dialog)

The Alchemer Mobile dialog layout style has a lot of padding that doesn't work well with a header image, so we'll have to override it with our own style.

```
<style name="Cookbook2.Dialog.Layout" parent="">
  <item name="android:background">?colorSurface</item>
</style>
```

Dialog header images

Used in: Love Dialog, Prompt, and Alchemer Mobile Rating Dialog

We use some negative padding here to cover up a margin that the Android system likes to create for Dialogs.

```
<style name="Cookbook2.Dialog.HeaderImage" parent="">
  <item name="android:adjustViewBounds">true</item>
  <item name="android:layout_marginBottom">4dp</item>
  <item name="android:paddingStart">-2dp</item>
  <item name="android:paddingEnd">-2dp</item>
</style>
```

Dialog title text style

Used in: Love Dialog, Prompt, Survey (close dialog), and Alchemer Mobile Rating Dialog

The text style for all dialog titles look the same, so we can share this style between all of them.

```
<style name="Cookbook2.Dialog.Title" parent="Apptentive.TextAppearance.Title.Dialog.WithMessage">
  <item name="android:textStyle">bold</item>
  <item name="android:paddingTop">12dp</item>
  <item name="android:paddingStart">24dp</item>
  <item name="android:paddingEnd">24dp</item>
</style>
```

Dialog message style

Used in: Prompt, Survey (close dialog), and Alchemer Mobile Rating Dialog

We already have a title style defined that we'll be sharing between all dialogs. We just need to adjust our message style.

```
<style name="Cookbook2.Dialog.Message" parent="Apptentive.TextAppearance.Message.Dialog">
  <item name="android:textSize">16sp</item>
  <item name="android:paddingTop">8dp</item>
  <item name="android:paddingStart">24dp</item>
  <item name="android:paddingEnd">24dp</item>
</style>
```

Dialog button layout and borderless buttons

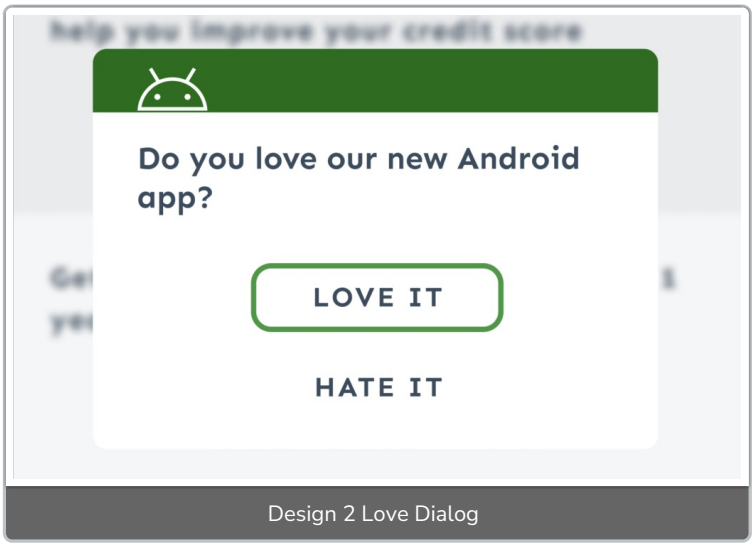

Used in: Love Dialog, Prompt, Survey (close dialog), and Rating Dialog

Borderless buttons have a different design, so we'll have a text button style for them.

```
 <style name="Cookbook2.Dialog.ButtonLayout" parent="">
    <item name="android:orientation">vertical</item>
    <item name="android:gravity">center</item>
    <item name="android:paddingTop">20dp</item>
    <item name="android:paddingBottom">16dp</item>
</style>

<style name="Cookbook2.Dialog.Button.Borderless" parent="Apptentive.Widget.Dialog.Button">
    <item name="android:textColor">?colorOnSurface</item>
    <item name="android:textStyle">bold</item>
    <item name="android:minWidth">192dp</item>
    <item name="android:gravity">center</item>
    <item name="cornerRadius">10dp</item>
</style>
```

1. The Love Dialog

Design 2 Love Dialog

The layout

Uses `apptentiveLoveDialogLayoutStyle`.

We can use the `Cookbook2.Dialog.Layout` style that we created earlier.

The header image

Uses `apptentiveLoveDialogHeaderImageStyle`.

There is a placeholder within the Alchemer Mobile designs for each interaction to include a header image.

We'll create a style for the one in Love Dialog while leveraging the shared style we have

```
<style name="Cookbook2.Dialog.HeaderImage.LoveDialog">
   <item name="android:src">@drawable/cookbook_2_love_dialog_header</item>
</style>
```

The title

Uses `apptentiveLoveDialogTitleStyle`.

We can use the `Cookbook2.Dialog.Title` that we created earlier.

The buttons and button layout

Uses `apptentiveLoveDialogButtonLayoutStyle`, `apptentiveLoveDialogButtonLayoutStyleAlternate`, `apptentiveLoveDialogYesButtonStyleAlternate`, and `apptentiveLoveDialogNoButtonStyleAlternate`.

Here we are utilizing the alternate layout for the Love Dialog buttons. This allows a Yes -> No ordering of the buttons instead of the default No -> Yes button ordering.\

We can use the `Cookbook2.Dialog.ButtonLayout` style we created earlier for the alternate button layout.

The alternate layout will just be set with no style attached in order to override the default one in our SDK that makes the visibility for it `gone`.

We can use the `Cookbook2.Button` and `Cookbook2.Button.Borderless` styles that we created earlier for the buttons.

We'll just have to create a style to tell the default button layout to not show.

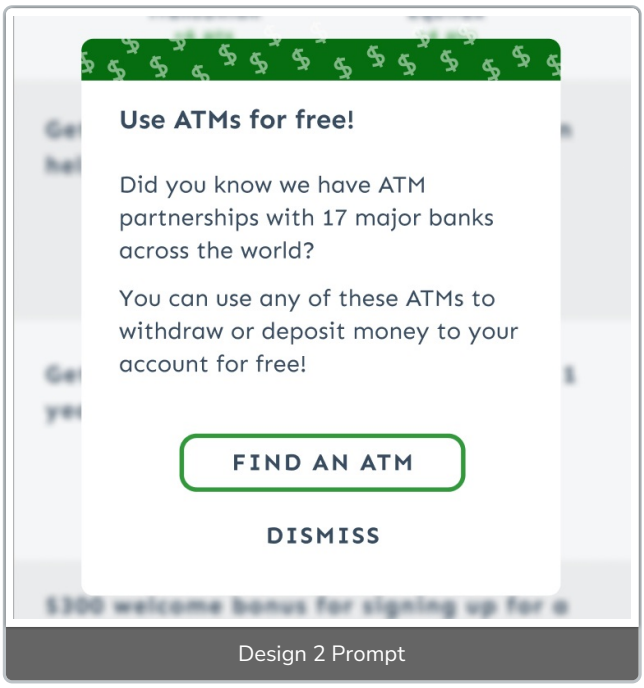

```
 <style name="Cookbook2.Dialog.ButtonLayout.LoveDialog" parent="">
    <item name="android:visibility">gone</item>
</style>
```

The styles

```
 <item name="apptentiveFontFamilyDefault">@font/sen</item>
<item name="colorSecondary">#34993E</item>
<item name="apptentiveHeaderAlpha">1</item>
<item name="apptentiveSubheaderAlpha">.8</item>
<item name="apptentiveTextSizeDefault">15sp</item>
<item name="colorSurface">#FFFFFF</item>
<item name="colorOnSurface">#3A4C5F</item>

<item name="apptentiveLoveDialogLayoutStyle">@style/Cookbook2.Dialog.Layout</item>
<item name="apptentiveLoveDialogHeaderImageStyle">@style/Cookbook2.Dialog.HeaderImage.LoveDialog
</item>
<item name="apptentiveLoveDialogTitleStyle">@style/Cookbook2.Dialog.Title</item>
<item name="apptentiveLoveDialogButtonLayoutStyle">@style/Cookbook2.Dialog.ButtonLayout.LoveDialog
</item>
<item name="apptentiveLoveDialogButtonLayoutStyleAlternate">@style/Cookbook2.Dialog.ButtonLayout</i
tem>
<item name="apptentiveLoveDialogYesButtonStyleAlternate">@style/Cookbook2.Button</item>
<item name="apptentiveLoveDialogNoButtonStyleAlternate">@style/Cookbook2.Button.Borderless</item>
```

2. The Prompt (formerly Notes)

Design 2 Prompt

The layout

Uses `apptentiveNoteLayoutStyle`.

We can use the `Cookbook2.Dialog.Layout` that we created earlier.

The header image

Uses `apptentiveNoteHeaderImageStyle`.

There is a placeholder within the Alchemer Mobile designs for each interaction to include a header image.

We'll create a style for the one in Notes while leveraging the shared style.

```
 <style name="Cookbook2.Dialog.HeaderImage.Note">
   <item name="android:src">@drawable/cookbook_2_note_header</item>
</style>
```

The titles and message

Uses `apptentiveNoteTitleWithMessageTextStyle`, `apptentiveNoteTitleOrMessageOnlyTextStyle`, and `apptentiveNoteMessageTextStyle`.

We can use the `Cookbook2.Dialog.Title` and the `Cookbook2.Dialog.Message` styles that we created earlier.

The buttons and button layout

Uses `apptentiveNoteButtonLayoutStyle`, `apptentiveNoteButtonStyle`, and `apptentiveNoteDismissButtonStyle`.

We can use the `Cookbook2.Dialog.ButtonLayout` that we created earlier for the button layout.

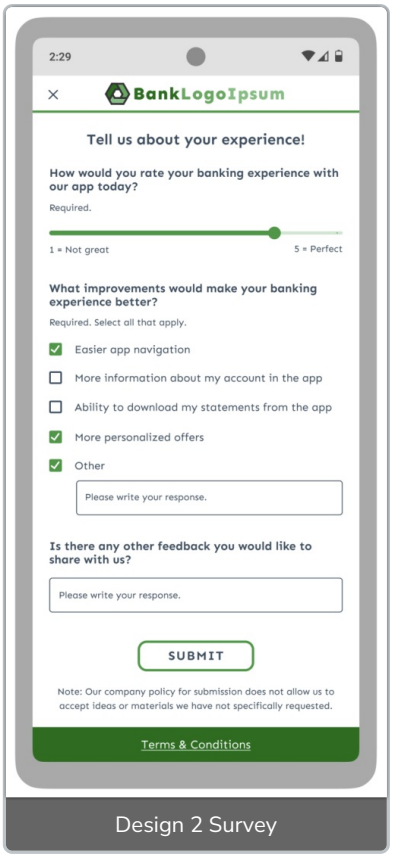

We can use the `Cookbook2.Button` and `Cookbook2.Dialog.Borderless` styles that we created earlier.

The styles

```
 <item name="apptentiveFontFamilyDefault">@font/sen</item>
<item name="colorSecondary">#34993E</item>
<item name="apptentiveHeaderAlpha">1</item>
<item name="apptentiveSubheaderAlpha">.8</item>
<item name="apptentiveTextSizeDefault">15sp</item>
<item name="colorSurface">#FFFFFF</item>
<item name="colorOnSurface">#3A4C5F</item>

<item name="apptentiveNoteLayoutStyle">@style/Cookbook2.Dialog.Layout</item>
<item name="apptentiveNoteHeaderImageStyle">@style/Cookbook2.Dialog.HeaderImage.Note</item>
<item name="apptentiveNoteTitleWithMessageTextStyle">@style/Cookbook2.Dialog.Title</item>
<item name="apptentiveNoteTitleOrMessageOnlyTextStyle">@style/Cookbook2.Dialog.Title</item>
<item name="apptentiveNoteMessageTextStyle">@style/Cookbook2.Dialog.Message</item>
<item name="apptentiveNoteButtonLayoutStyle">@style/Cookbook2.Dialog.ButtonLayout</item>
<item name="apptentiveNoteButtonStyle">@style/Cookbook2.Button</item>
<item name="apptentiveNoteDismissButtonStyle">@style/Cookbook2.Button.Borderless</item>
```

3. The Survey

Design 2 Survey

The toolbar and bottom app bar

Uses `apptentiveSurveyToolbarStyle` and `apptentiveSurveyBottomAppBarStyle`.

The toolbar uses the survey header drawable we created.

The bottom app bar is slightly bigger than our Alchemer Mobile design.

```
 <style name="Cookbook2.Survey.Toolbar" parent="Apptentive.Widget.Survey.Toolbar">
    <item name="android:background">@drawable/cookbook_2_survey_toolbar_background</item>
    <item name="navigationIconTint">?colorOnBackground</item>
</style>

<style name="Cookbook2.Survey.BottomAppBar" parent="">
    <item name="android:background">?colorPrimary</item>
    <item name="android:minHeight">44dp</item>
</style>
```

The small header image

Uses `apptentiveSurveyTitleStyle` and `apptentiveSurveyHeaderImageStyle`.

To include a small header image into the toolbar we'll want to hide the title text that is present, then we can add the image `src` and give it a `center` `layout_gravity`.

```
 <style name="Cookbook2.Survey.Title" parent="">
    <item name="android:visibility">gone</item>
</style>

<style name="Cookbook2.Survey.HeaderImage" parent="">
    <item name="android:src">@drawable/cookbook_2_survey_header</item>
    <item name="android:layout_gravity">center</item>
</style>
```

The introduction

Uses `apptentiveSurveyIntroductionStyle`.

Both the title and introduction can leverage `Apptentive.TextAppearance` style to reduce the boilerplate code.

```
 <style name="Cookbook2.Survey.Introduction" parent="Apptentive.TextAppearance.Introduction.Survey">
    <item name="android:textSize">19sp</item>
    <item name="android:textStyle">bold</item>
    <item name="android:layout_marginTop">8dp</item>
</style>
```

The footer text

Uses `apptentiveSurveyFootnoteStyle`

This is another hidden element within our UI that allows you to add footer text to your survey.

```
 <style name="Cookbook2.Survey.Footnote" parent="">
    <item name="android:fontFamily">@font/sen</item>
    <item name="android:textColor">?colorOnBackground</item>
    <item name="android:textSize">11sp</item>
    <item name="android:gravity">center</item>
    <item name="android:paddingStart">16dp</item>
    <item name="android:paddingEnd">16dp</item>
    <item name="android:layout_marginTop">16dp</item>
    <item name="android:layout_marginBottom">16dp</item>
    <item name="android:text">Note: Our company policy for submission does not allow us to accept ideas or
materials we have not specifically requested.</item>
</style>
```

The submit button

Uses `apptentiveSurveySubmitButtonStyle`.

We can use the `Cookbook2.Button` style we created earlier.

The close dialog

Uses `apptentiveGenericDialogTitleTextStyle`, `apptentiveGenericDialogMessageTextStyle`, `apptentiveGenericDialogButtonLayoutStyle`, `apptentiveGenericDialogPositiveButtonStyle`, and `apptentiveGenericDialogNegativeButtonStyle`

This dialog appears when you have answered a question or hit the submit button with errors then try to exit the survey.

This is seen less often, but it's good to have it tie in with the rest of your designs. Luckily, we can use the `Cookbook2.Dialog.Title`, `Cookbook2.Dialog.Message`, `Cookbook2.Dialog.ButtonLayout.Stacked`, and `Cookbook2.Button` styles we created earlier.

The styles

```
 <item name="apptentiveFontFamilyDefault">@font/sen</item>
<item name="colorSecondary">#34993E</item>
<item name="apptentiveHeaderAlpha">1</item>
<item name="apptentiveSubheaderAlpha">.8</item>
<item name="apptentiveTextSizeDefault">15sp</item>
<item name="colorPrimary">#056E0F</item>
<item name="colorOnPrimary">#FFFFFF</item>
<item name="android:colorBackground">#FFFFFF</item>
<item name="colorOnBackground">#3A4C5F</item>
<item name="android:statusBarColor">#FFFFFF</item>
<item name="android:windowLightStatusBar" tools:ignore="NewApi">true</item>

<item name="apptentiveSurveyToolbarStyle">@style/Cookbook2.Survey.Toolbar</item>
<item name="apptentiveSurveyBottomAppBarStyle">@style/Cookbook2.Survey.BottomAppBar</item>
<item name="apptentiveSurveyTitleStyle">@style/Cookbook2.Survey.Title</item>
<item name="apptentiveSurveyHeaderImageStyle">@style/Cookbook2.Survey.HeaderImage</item>
<item name="apptentiveSurveyIntroductionStyle">@style/Cookbook2.Survey.Introduction</item>
<item name="apptentiveSurveyFootnoteStyle">@style/Cookbook2.Survey.Footnote</item>
<item name="apptentiveSurveySubmitButtonStyle">@style/Cookbook2.Button</item>

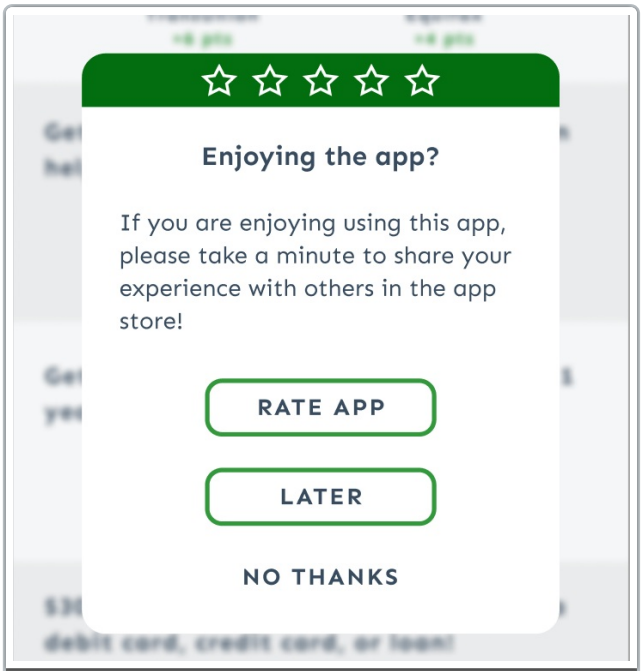

<item name="apptentiveGenericDialogTitleTextStyle">@style/Cookbook2.Dialog.Title</item>
<item name="apptentiveGenericDialogMessageTextStyle">@style/Cookbook2.Dialog.Message</item>
<item name="apptentiveGenericDialogButtonLayoutStyle">@style/Cookbook2.Dialog.ButtonLayout.Stacked
</item>
<item name="apptentiveGenericDialogPositiveButtonStyle">@style/Cookbook2.Button</item>
<item name="apptentiveGenericDialogNegativeButtonStyle">@style/Cookbook2.Button</item>
```

4. The Alchemer Mobile Rating Dialog

The Alchemer Mobile Rating Dialog is an interaction by Alchemer Mobile that is primarily used as a solution for alternate app stores but also can serve as an optional alternative to the Google In-App Review prompt.

The Google In-App Review is the preferred way to ask for reviews for apps in the Play Store and is enabled by default.

This is enabled by providing a store URL into `customAppStoreURL` within `ApptentiveConfiguration`.

Design 2 Alchemer Mobile Rating Dialog

The dialog layout

Uses `apptentiveRatingDialogLayoutStyle`.

The Alchemer Mobile Rating Dialog always has 3 buttons and doesn't need a button layout. They will always be vertical. We just need to add some additional padding to the bottom for this design.

```
<style name="Cookbook2.Dialog.Layout.RatingDialog">
  <item name="android:paddingBottom">20dp</item>
</style>
```

The header image

Uses `apptentiveRatingDialogHeaderImageStyle`.

There is a placeholder within the Apptentive designs for each interaction to include a header image.

We'll create a style for the one in the Apptentive Rating Dialog while leveraging the shared style.

```
<style name="Cookbook2.Dialog.HeaderImage.RatingDialog" parent="">
  <item name="android:src">@drawable/cookbook_2_rating_dialog_header</item>
</style>
```

The title

Uses `apptentiveRatingDialogTitleTextStyle`.

A different alignment and some additional padding are needed.

```
<style name="Cookbook2.Dialog.Title.RatingDialog">
    <item name="android:textAlignment">center</item>
    <item name="android:paddingTop">20dp</item>
    <item name="android:paddingBottom">16dp</item>
</style>
```

The message

Uses `apptentiveRatingDialogMessageTextStyle`.

We can use the `Cookbook2.Dialog.Message` style we created earlier.

The buttons

Uses `apptentiveRatingDialogButtonRateStyle`, `apptentiveRatingDialogButtonRemindStyle`, and `apptentiveRatingDialogButtonDeclineStyle`.

We can utilize most code from the `Cookbook2.Button` and `Cookbook2.Button.Borderless` styles.

```
<style name="Cookbook2.Button.RatingDialog">
    <item name="android:layout_gravity">center</item>
    <item name="android:layout_marginTop">12dp</item>
    <item name="android:layout_marginBottom">4dp</item>
</style>

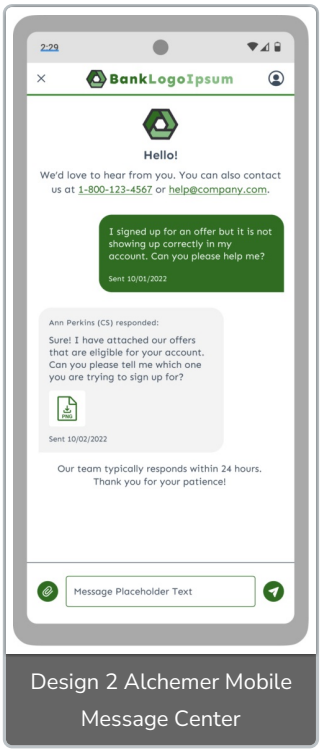

<style name="Cookbook2.Button.Borderless.RatingDialog">
    <item name="android:layout_gravity">center</item>
</style>
```

The styles

```
<item name="apptentiveFontFamilyDefault">@font/sen</item>
<item name="colorSecondary">#34993E</item>

```

6. Setting all the styles

The last thing is defining what styles will apply to what interaction. The best place to do this is within the `ApptentiveThemeOverride` style within your `styles.xml` file.

All the styles

```
 <!-- General -->
<style name="Cookbook2.Button" parent="Widget.MaterialComponents.Button.OutlinedButton">
    <item name="android:paddingTop">10dp</item>
    <item name="android:paddingBottom">10dp</item>
    <item name="android:layout_weight">1</item>
    <item name="android:fontFamily">@font/sen</item>
    <item name="android:textColor">?colorOnSurface</item>
    <item name="android:textSize">15sp</item>
    <item name="android:textStyle">bold</item>
    <item name="android:minWidth">192dp</item>
    <item name="cornerRadius">10dp</item>
    <item name="strokeColor">?colorSecondary</item>
    <item name="strokeWidth">3dp</item>
</style>

<!-- Dialogs -->
<style name="Cookbook2.Dialog.Layout" parent="">
    <item name="android:background">?colorSurface</item>
</style>

<style name="Cookbook2.Dialog.HeaderImage" parent="">
    <item name="android:adjustViewBounds">true</item>
    <item name="android:layout_marginBottom">4dp</item>
    <item name="android:paddingStart">-2dp</item>
```

```
    <item name="android:paddingStart">-2dp</item>
    <item name="android:paddingEnd">-2dp</item>
</style>

<style name="Cookbook2.Dialog.Title" parent="Apptentive.TextAppearance.Title.Dialog.WithMessage">
    <item name="android:textStyle">bold</item>
    <item name="android:paddingTop">12dp</item>
    <item name="android:paddingStart">24dp</item>
    <item name="android:paddingEnd">24dp</item>
</style>

<style name="Cookbook2.Dialog.Message" parent="Apptentive.TextAppearance.Message.Dialog">
    <item name="android:lineSpacingExtra">3sp</item>
    <item name="android:paddingTop">8dp</item>
    <item name="android:paddingStart">24dp</item>
    <item name="android:paddingEnd">24dp</item>
</style>

<style name="Cookbook2.Dialog.ButtonLayout.Stacked" parent="">
    <item name="android:orientation">vertical</item>
    <item name="android:gravity">center</item>
    <item name="android:paddingTop">20dp</item>
    <item name="android:paddingBottom">16dp</item>
</style>

<style name="Cookbook2.Button.Borderless" parent="Apptentive.Widget.Dialog.Button">
    <item name="android:textColor">?colorOnSurface</item>
    <item name="android:textStyle">bold</item>
    <item name="android:minWidth">192dp</item>
    <item name="android:gravity">center</item>
    <item name="cornerRadius">10dp</item>
</style>

<!-- Love Dialog -->
<style name="Cookbook2.Dialog.HeaderImage.LoveDialog">
    <item name="android:src">@drawable/cookbook_2_love_dialog_header</item>
</style>

<style name="Cookbook2.Dialog.ButtonLayout.LoveDialog" parent="">
