React Native Release Notes

Version 6.1.3

New & Improved

- Better Android error handling
- Message Observer cleanup

Native SDK Dependencies

- Alchemer Mobile Android SDK: 6.1.0
- Alchemer Mobile iOS SDK: 6.2.2

Version 6.1.2

Bugs Fixed

- Added a check to avoid treating 0 and 1 as boolean values for custom data.

Native SDK Dependencies

- Alchemer Mobile Android SDK: 6.0.4
- Alchemer Mobile iOS SDK: 6.2.0

Version 6.1.1

New & Improved

Version 6.1 includes the new Alchemer Mobile (Apptentive) Kit Android SDK

Native SDK Dependencies

- Alchemer Mobile Android SDK: 6.0.3
- Alchemer Mobile iOS SDK: 6.1.0

Migration Notes

- For most developers this should be a transparent migration with no additional steps (update the `apptentive-react-native` entry in your `package.json` to accept version 6).
- Login/logout (Client Authentication) is not supported in this release.
- Customizing Interactions on Android requires native code in this release (see our Android customization guide).

Version 6.0

New & Improved

Version 6.0 includes the new Alchemer Mobile (formerly Apptentive) Kit iOS SDK as well as a revamped example app.

Native SDK Dependencies

- Alchemer Mobile (Apptentive) Android SDK: 5.8.3
- Alchemer Mobile (Apptentive) iOS SDK: 6.0.2

Migration Notes

- For most developers this should be a transparent migration with no additional steps (update the `apptentive-react-native` entry in your `package.json` to accept version 6).
- Login/logout (Client Authentication) is not supported in this release.
- Customizing Survey and Message Center interactions on iOS requires native code in this release (see our iOS customization guide).
