

Alchemer Workflow Slack Integration

Alchemer Workflow also integrates with Slack. This integration is built the same as a [Slack integration action](#) in Alchemer Survey.

To get started, follow these [detailed instructions](#) to connect a Slack Account with your Alchemer account.

How does a Slack integration function inside Alchemer Workflow?

- The integration allows you to send Slack messages directly to a Slack channel or individual user based on specific conditions or the completion of previous workflow steps.
- Once setup is complete, you can drag a Slack Step from the Steps list on the right side of the screen.
- Click into the Slack Step to add the specific channel, recipient, and message.

The screenshot displays the Alchemer Workflow Builder interface for a workflow titled "New Feature Request". The interface is divided into several sections:

- Header:** "New Feature Request" with navigation tabs for "BUILD", "TEST", and "MONITOR".
- Workflow Status:** "Active" (indicated by a red dot), "0 Completed", and "1 In Progress".
- Workflow Timeline:** A vertical sequence of steps:
 - Step 0:** "Initiate Workflow" containing a "Share Link" action with the URL "https://app.alchemer.com/wfs/next?id=63bef...".
 - Step 1:** "Survey Invite".
 - Step 2:** "Survey" with the configuration "Survey Name: HR NPS Pulse Survey".
- Right Panel (Steps):** A list of available actions categorized into:
 - Collect Feedback: Survey Invite, Survey
 - Communicate: Send Email
 - Orchestrate: If/Else Logic, Stop, Delay
 - Connections: Salesforce Pull, Salesforce Push, **Slack** (highlighted with a red box), Microsoft Teams
