

Alchemer Release Notes: September 28, 2023

Alchemer Survey

Improvements

[Update] – Various survey usability improvements.

Fixes

[Update] – Fixed a display issue with grid questions when using the new mobile-optimized survey theme.

[Update] – Fixed a display issue with the Contact Form question when using the new mobile-optimized survey theme.

Alchemer Workflow

Improvements

[Update] – Launched two new Alchemer Workflow initiators. Alchemer Workflow customers can now initiate Workflows off of Custom Events, and use the Scheduled initiator to schedule the start of a workflow. [Learn more.](#)

[Update] – Added additional pre-built event triggers for the Zendesk, Asana, and Paylocity Initiators. [Learn more.](#)

[Update] – The initiator logo image automatically updates when a new initiator is selected.

[Update] – Various usability improvements to the Alchemer Workflow Initiator setup process.

[Update] – Several improvements were made to If/Else logic block functionality, including:

- If/Else logic using initiator fields now supports complex, multi-field logic.
- When selecting fields to use in If/Else logic, numbers on fields from the initiator have been removed.
- If/Else logic conditions can now be edited without seeing an error when using fields from the initiator.

[Update] – Workflows can be deactivated without refreshing after changes are made.
