Alchemer Release Notes: October 30, 2023

Alchemer Survey

Improvements

[Update] – Images will crop instead of stretch when added to image-based questions using the new mobile optimized survey theme.

Fixes

[Fixes] – Fixed an issue with URL variable elements in Standard Reports.

[Fixes] – Fixed an issue where special characters in SMTP integration passwords were causing email delivery issues.

Alchemer Workflow

Improvements

[Update] – Launched five new Alchemer Workflow initiators. Alchemer Workflow customers can now initiate Workflows off of events in Braze, Gladly, Kustomer, Shopify, and Slack. Learn more.

[Update] – Added the ability to change the workflow initiator after you've created the workflow.

[Update] – Initiators are now displayed in alphanumeric order.

Fixes

[Fixes] – Fixed scrolling issues on the Initiator selection screen.

[Fixes] – Fixed an issue so all external initiator fields correctly show up in If/Else blocks.

[Fixes] – Fixed an issue so clicking Reset Changes no longer changes the workflow activation state.
