

Alchemer Workflow ZohoSign Integration

The Alchemer Zoho Sign Integration is available as an add-on. If you are interested in purchasing the Zoho Sign Integration, please [contact us](#) for additional information.

Alchemer's integration with Zoho Sign allows you to:

- Automate the process of sending documents for signing, after events occur in Alchemer Workflow.

What are some use cases for this integration?

- After a customer completes a survey, automatically send a Zoho Sign template for signing.
- Use logic to only send a Zoho Sign template to customers that provided certain feedback or answers on their survey.

Integration Setup

1. Create a Workflow in Alchemer and select your initiator.

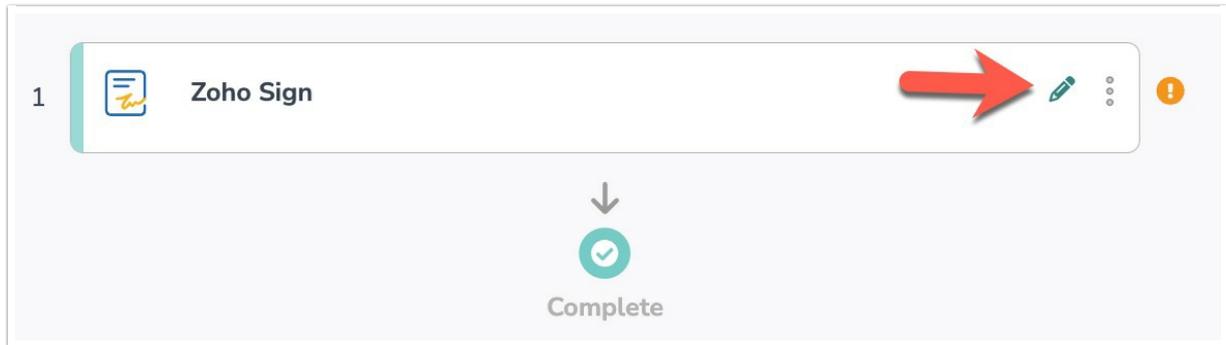

For more information on building Workflows in Alchemer refer to the following documentation:

- [Getting Started with Alchemer Workflow](#)
- [Building a Workflow](#)

2. When you are ready to add the Zoho Sign step to your Workflow, drag the Zoho Sign step from the Step Library under Connections.

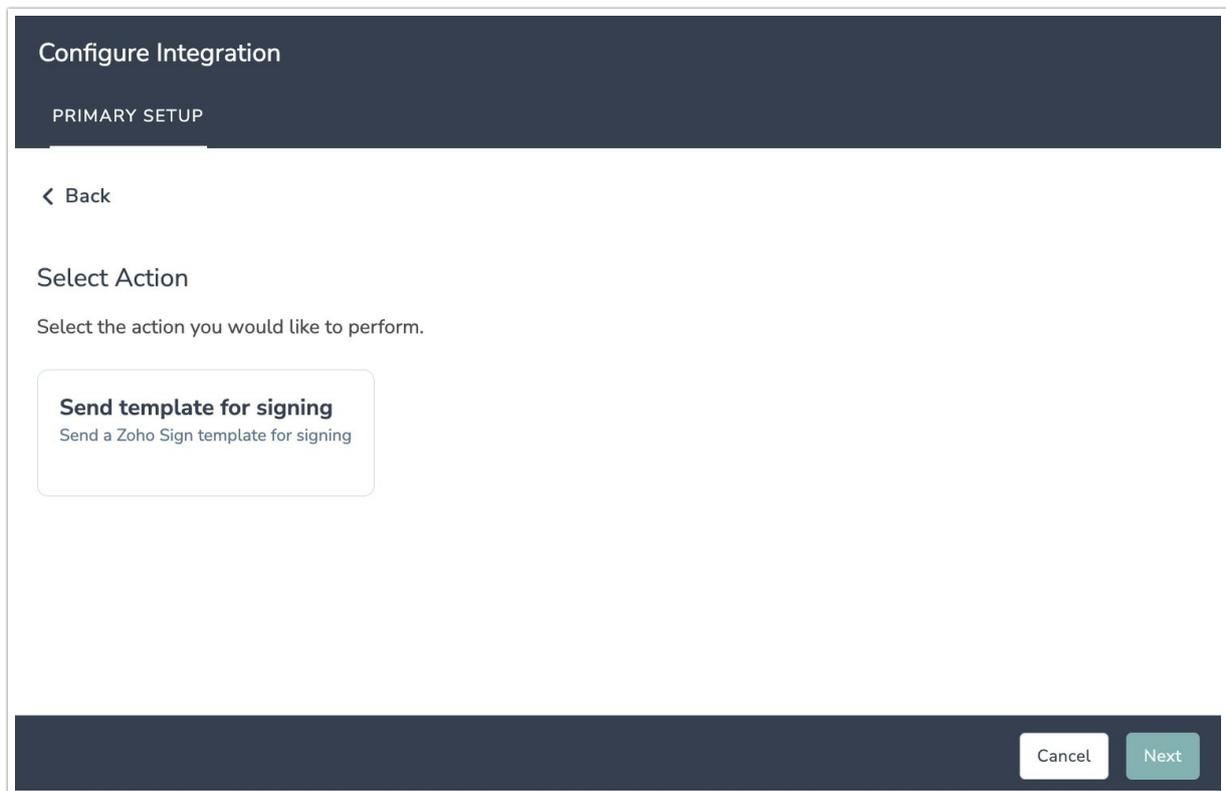

The screenshot displays the Alchemer Workflow Builder interface. At the top, the 'Zoho Sign' integration is highlighted. The main workspace shows a 'Workflow Timeline' with two steps: 'Initiate Workflow' (step 0) and 'Zoho Sign' (step 1). The 'Initiate Workflow' step includes a 'Share Link' action with a copyable URL: `https://app.alchemer.com/wfs/next?id=669ec...`. The 'Zoho Sign' step is currently empty. On the right side, a 'Steps' library is visible, listing various actions like 'Stop', 'Delay', and 'Connections'. Under the 'Connections' section, several integrations are listed, including 'Salesforce Pull', 'Salesforce Push', 'Slack', 'Microsoft Teams', 'Gladly', and 'Zoho Sign', which is highlighted in blue. The interface also features a navigation sidebar on the left and a top navigation bar with 'BUILD', 'TEST', and 'MONITOR' tabs.

3. Click the pencil icon to configure your Zoho Sign integration step.

4. Select the integration action you'd like to use.

- **Send template for signing:** Send a Zoho Sign template for signing. Jump to this section for specific guidance on this integration action.

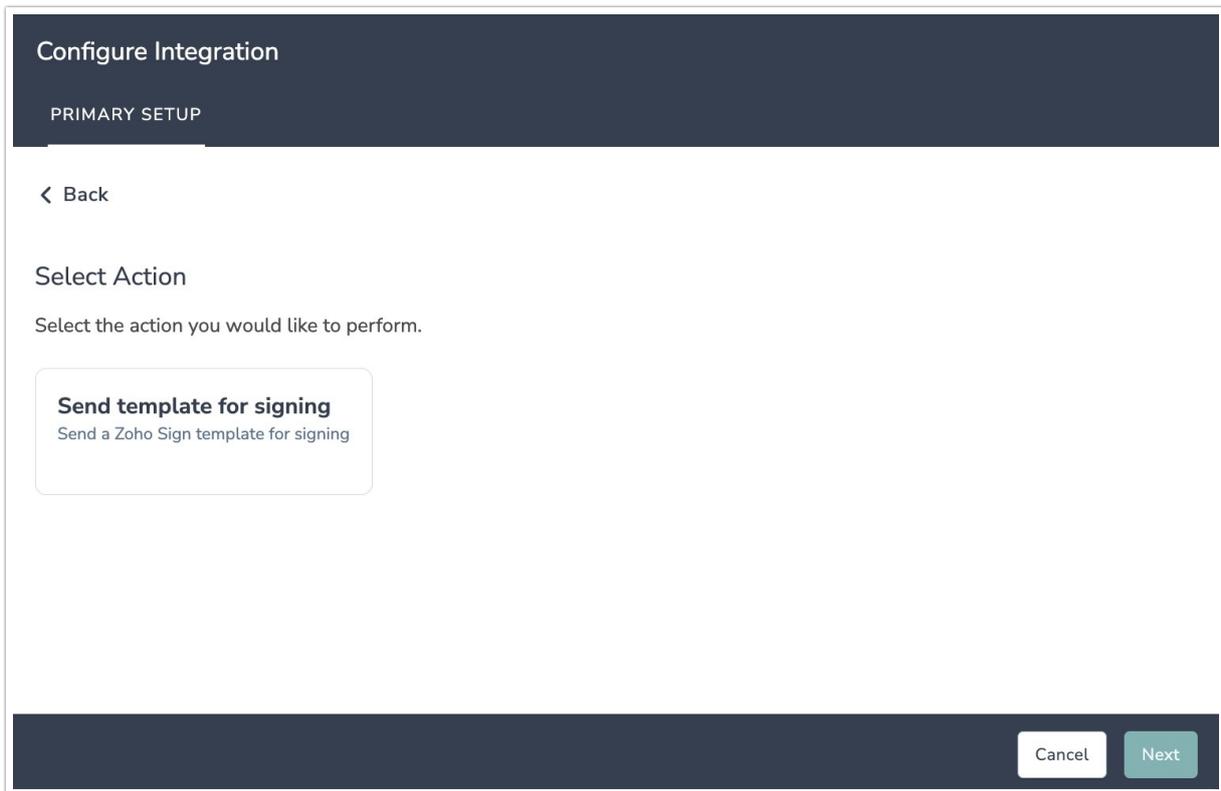

Zoho Sign | Send Template for Signing

To complete setup for this integration action, you will need:

- Your Zoho Sign login
- Templates setup in Zoho Sign
- Fields in this Workflow that will contain the name and email address of the person to send the template for signing

1. Select "Send template for signing" as your integration action.

Configure Integration

3. Create a new authentication.

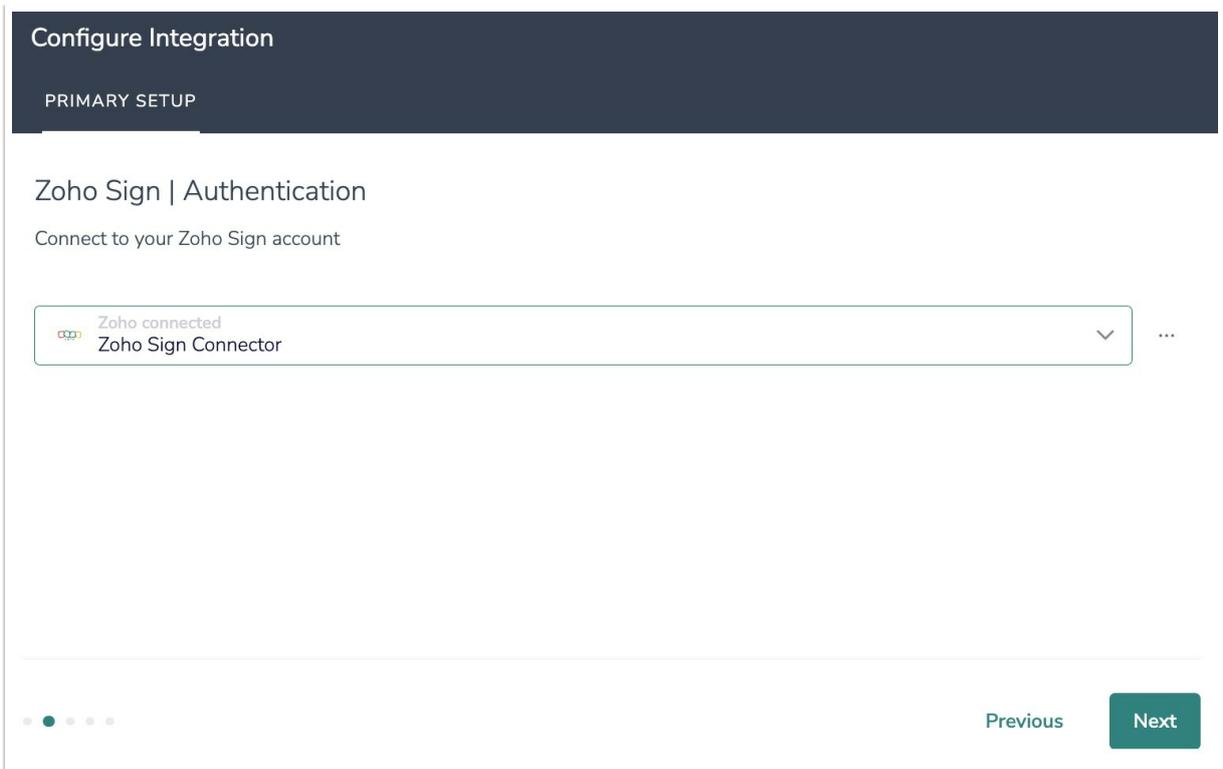

4. Name your authentication then click "Create"

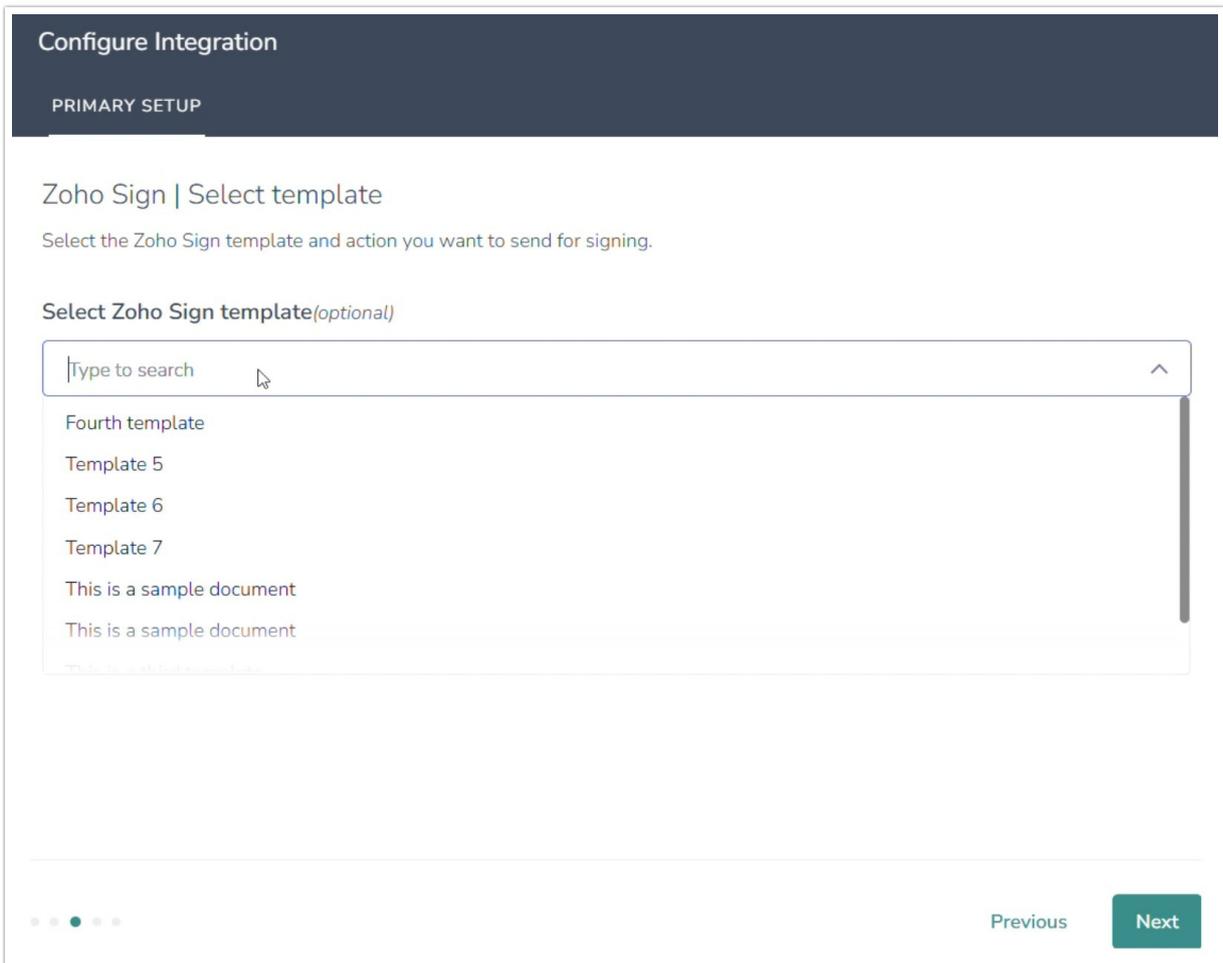

5. In the Zoho sign-in window that appears, provide your credentials.

6. After completing login, click "Next" on the Alchemer authentication screen.

7. Select the Zoho Sign template and action you want to send for signing.

8. Select the fields question answers from Alchemer that contain the recipient info and fields.

The template default values are used for when fields are not mapped.

Zoho requires both the recipient name and email to configure an action.

Configure Integration

PRIMARY SETUP

Zoho Sign | Select recipients and fields

Select the fields or question answers from Alchemer that contain the recipient info and fields.

Use this Alchemer field value	for this Zoho Sign field	
Step 0 Webhook input1	Zoho Sign Actions Signer 1 recipient_name	🗑️
Step 0 Webhook input2	Choose an option	🗑️
