

UKG Integration for Alchemer Survey

The Alchemer UKG Integration is available as an add-on. If you are interested in purchasing the UKG Integration, please [contact us](#) for additional information.

With the Alchemer UKG integration you can easily:

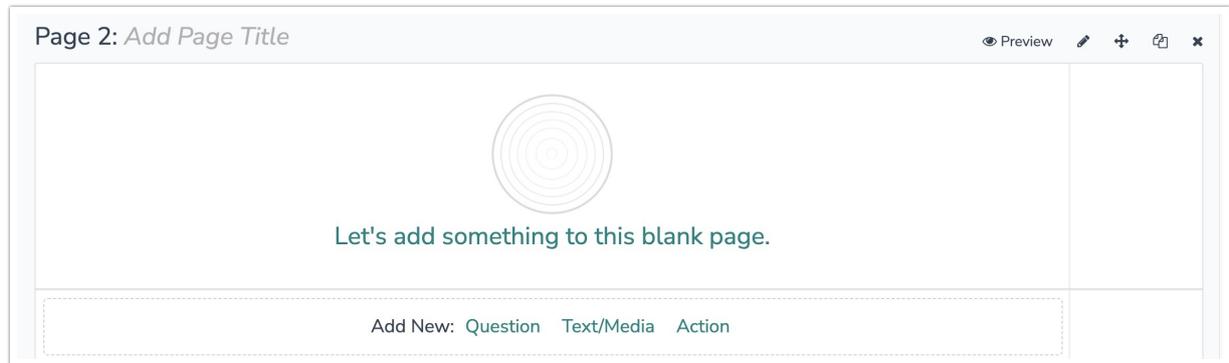

- Personalize surveys in Alchemer using person records from UKG

Integration Setup

Adding an Integration Action

1. Select an existing survey or create a new survey. Then navigate to the Survey Builder.
2. Click "Add New: Action"

You cannot add this Integration Action to the first page of the survey.

3. In the Add Action modal, scroll down to Integrations. Then click "Add" for your UKG integration.

Actions

4. Select UKG as your integration and then select the action you would like to perform:

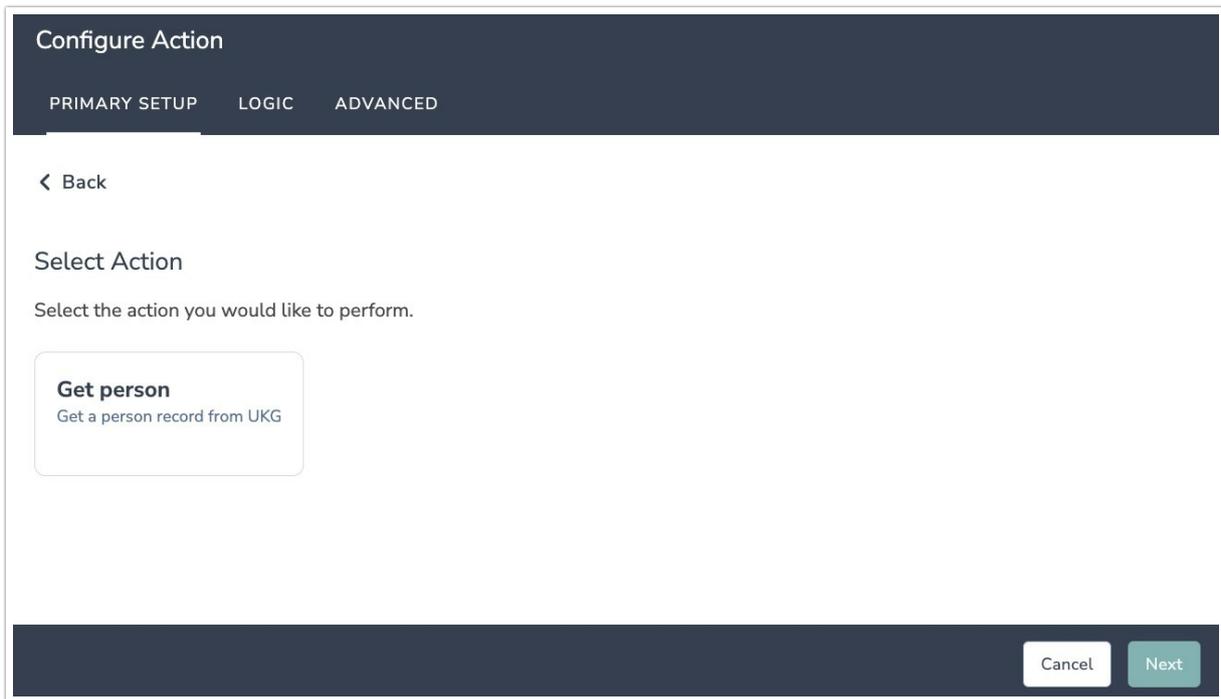

- Get person record from UKG

UKG | Get Person

Before configuring this integration action, you will need:

- Your UKG API information and login
- Fields in this survey that contain information to use to find the person to get (employee id, email, etc.)

1. Select "Get Person" and click "Next" on the integration overview screen.

The screenshot shows a 'Configure Action' interface with a dark header. Below the header are three tabs: 'PRIMARY SETUP', 'LOGIC', and 'ADVANCED'. A '< Back' link is visible. The main section is titled 'Select Action' and contains the instruction 'Select the action you would like to perform.' A single action card is displayed with the title 'Get person' and the description 'Get a person record from UKG'. At the bottom right, there are 'Cancel' and 'Next' buttons.

2. Click "Add New Authentication". Then name your authentication and provide your:

- Customer API key
- Basic auth username
- Basic auth password

Click "Create" when done.

The screenshot shows a 'Create a new authentication' dialog box with a close button (X) in the top right corner. It contains four input fields: 'Your authentication name', 'Customer API key', 'Basic auth username', and 'Basic auth password'. Each field currently contains the text 'No value'. At the bottom right, there are 'Previous' and 'Create' buttons.

3. Provide your UKG API Base URL

Your base URL should be something like this: <https://service2.ultipro.com>
