

Define or Edit a Custom Sort Order for a Chart

Alchemer Dashboard is currently waitlist only. [Visit this page](#) to learn more about Dashboard or join the waitlist!

You can define a custom sort order for a Chart to sort columns in a specific order based on your business needs. To define a custom sort order for a Chart:

1. Select Charts on the left navigation bar.
2. Select the Chart you want to edit.
3. Click **Column** on the right menu.
4. Under **Sort** select **Custom**.
5. Click Edit custom sort order.

1. In the **Custom sort** screen, search for and select the columns that you want to sort on.
2. Click **Save**.

Users can define a custom sort order for any Chart. Sort order defined in the Chart overrides the sort order defined in the Model for that particular Chart.

Users can switch between **Alphanumeric** and **Custom** sort order in the **Sort** menu.
