

Managing Apple Maps Listings through Apple Business Connect

Chatmeter can manage your listings on Apple Maps through the Apple API using the Apple Business Connect portal. As an Apple partner, the listing additions and updates that Chatmeter sends for your business through Apple Business Connect are addressed as a priority and loaded rapidly to Apple Maps. You can add them one by one, or many at once (bulk edit).

For us to use Apple Business Connect to manage your listings, you'll need to:

- Set up an Apple Business Connect account
- Delegate Chatmeter as a partner in your Apple Business Account
- Provide your company's Apple ID to Chatmeter

Set up an Apple Business Connect account

To set up an Apple Business Connect account, follow the instructions in the Apple help article that follows for this two-step process. First, you set up the account for your business, then you request Apple verification of the businesses associated with the account. It takes up to five days for Apple to verify your account.

The Apple help article [Create your account in Apple Business Connect](#) describes the account creation and delegation process.

To get started in creating your account, go to <https://businessconnect.apple.com/>. You'll add your businesses and supply the required verification documentation to Apple.

Note: If your company operates outside of the US, you must create a separate brand on Apple Business Connect for each country you operate in. Additionally, make sure to select whether the brand you are adding is company owned or a franchise.

Add your brand details

Provide information about your brand. Your brand is used in associated Apple features that you've set up.

Brand Name

Testbrand

Choose a name to display on features you set up across Apple. This name may appear on your Maps locations.

Country/Region

United States

Primary Category

Restaurant

The primary category describes the main business function.

Does your company own this brand?  

Yes, my company owns this brand

No, this brand is a franchise

Once you have created an account and the verification has been completed, you're ready to delegate to Chatmeter as a partner to manage your account.

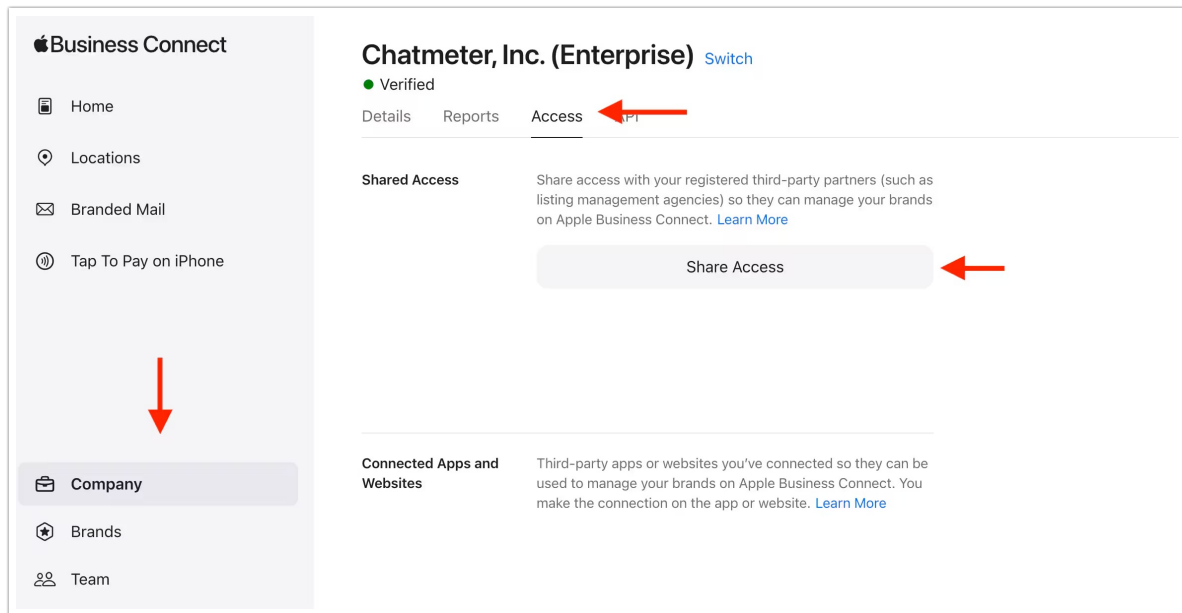

Delegate Chatmeter as a partner in your Apple Business Account

By delegating Chatmeter to manage listings in your Apple Business Account, you ensure that listing details for your locations are prioritized for rapid updates. This delegation also gives you the ability to manage Apple Maps cover and gallery images through LocationHQ.

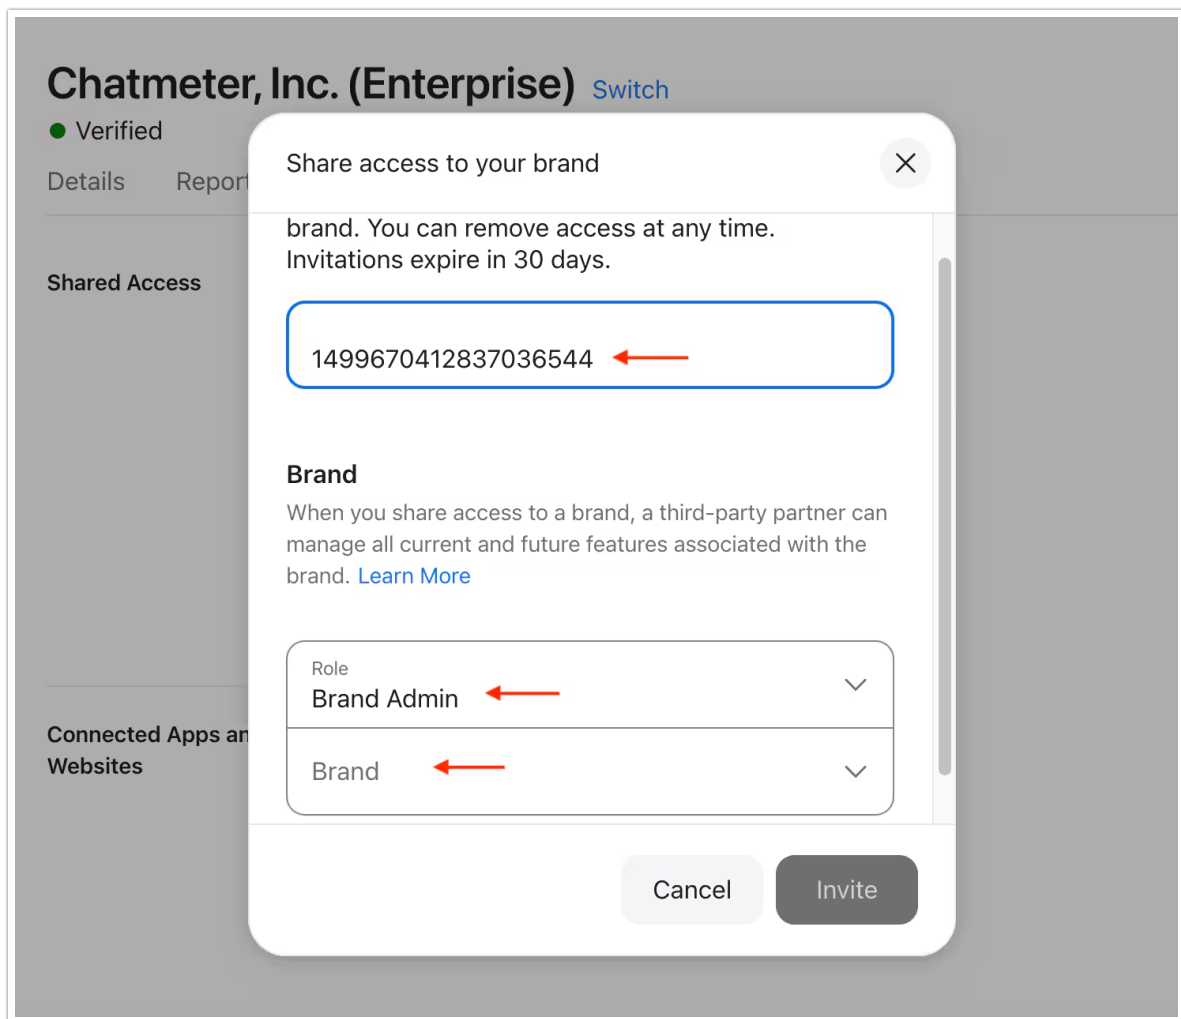

Before you start, you'll need the Chatmeter Company ID. This is: 1499670412837036544.

To delegate Chatmeter to manage listings, follow these steps:

1. Login to your Apple Business Connect account.
2. Select the Access tab.

3. Select **Share access** to display the **Share access to your company** dialog box.
4. Enter the **Chatmeter Company ID**, which is: 1499670412837036544.

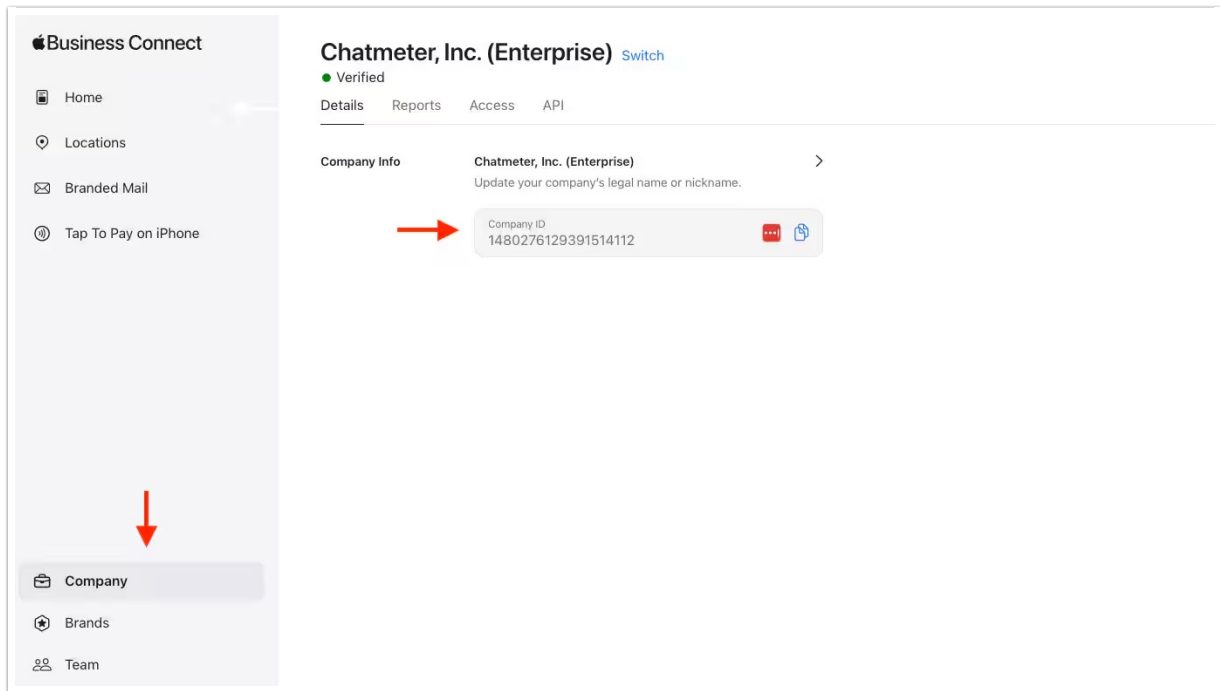

5. Set up **Brand Shared Access** for Chatmeter. The **Role** should be **Brand Admin**. If you give Chatmeter a **Brand Read-Only** role, Apple will restrict the service Chatmeter can give you.
6. Select **All Brands** or a specific brand you want Chatmeter to manage. Note that if you create a business after the original delegation, you will have to re-delegate the business to Chatmeter in Apple Business Connect.
7. Select **Invite** to save and send Chatmeter the list of delegated businesses. After Chatmeter accepts the invitation, Chatmeter is the officially delegated partner in Apple Business Connect.

Provide your company's Apple company ID to Chatmeter

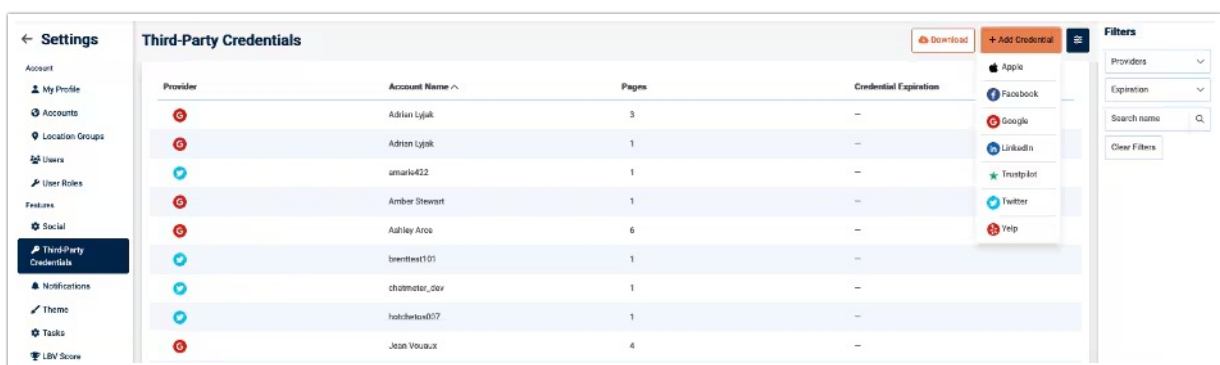

For each business entity you want Chatmeter manage, you need to supply your company's Apple Company ID to LocationHQ as a third-party credential.

To get your company's Apple Company ID, login to your Apple Business Connect account and click on the company name. You'll see your Apple Company ID in the **Company ID** field.

To add your company's Apple Company ID, follow these steps:

1. Login to your Chatmeter account in LocationHQ.
2. Select the Settings (cog) icon> **Third-Party Credentials** to display the **Third-Party Credentials** page.
3. Select **Add Credential** and choose **Apple** from the menu.

4. Enter your **Apple Company ID** on the **Add Apple Business Connect Account** dialog box.

Add Apple Business Connect Account

Prior to adding an Apple account, at least 1 business associated with the Apple Company ID must be delegated using the Apple Business Connect portal.

5. Select Add.

Add Chatmeter locations to your Apple Business Connect account

Once you've delegated Chatmeter as a partner and provided your company's Apple ID to Chatmeter, you can add Chatmeter locations to your Apple Business Connect account.

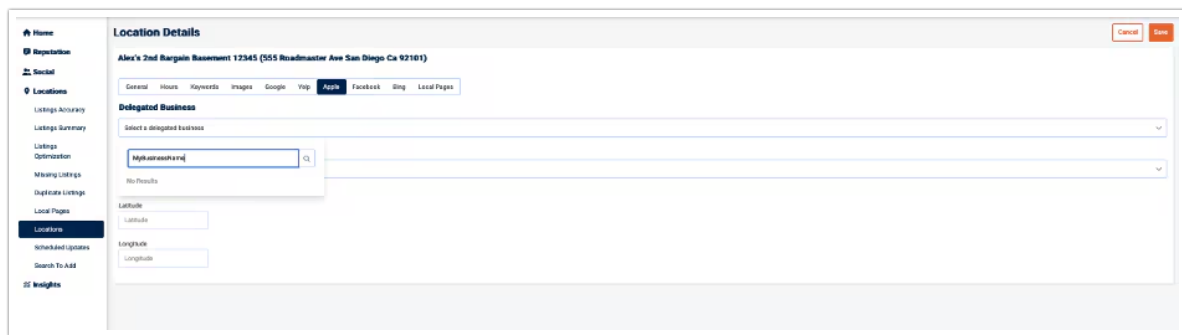

To add Chatmeter locations to your Apple Business Connect account, follow these steps:

1. Login to your Chatmeter account in LocationHQ.
2. Select **Location** > **Locations** to display the **Locations** page.
3. On the **Locations** page, select the location you want to add to your Apple Business Connect account. You can select more than one location if you want to add several at once to an Apple Business Connect account (bulk edit).
4. On the **Location Details** page, select the **Apple** tab.

The screenshot shows the 'Location Details' page for 'Alex's 2nd Bargain Basement 12345 (555 Roadmaster Ave San Diego Ca 92101)'. The 'Apple' tab is selected in the top navigation bar. The main content area includes a 'Delegated Business' dropdown menu, an 'Apple Categories' dropdown menu, and 'Apple Coordinates' fields for Latitude and Longitude. A sidebar on the left contains navigation links such as Home, Reputation, Social, Locations, and Insights.

5. In **Delegated Business**, select the Apple business name you want to associate with the Chatmeter location. Note that you can make this selection only once. After you've selected a

business, the field is locked.

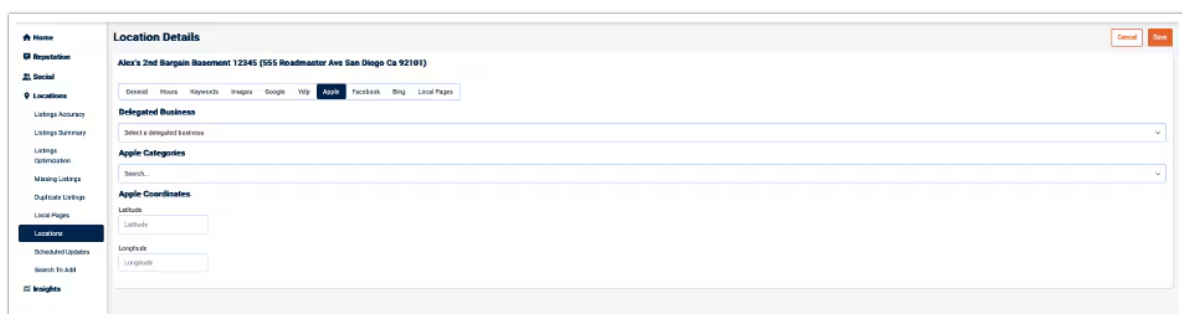

6. Select Save.

Managing Apple Maps cover and gallery images in LocationHQ

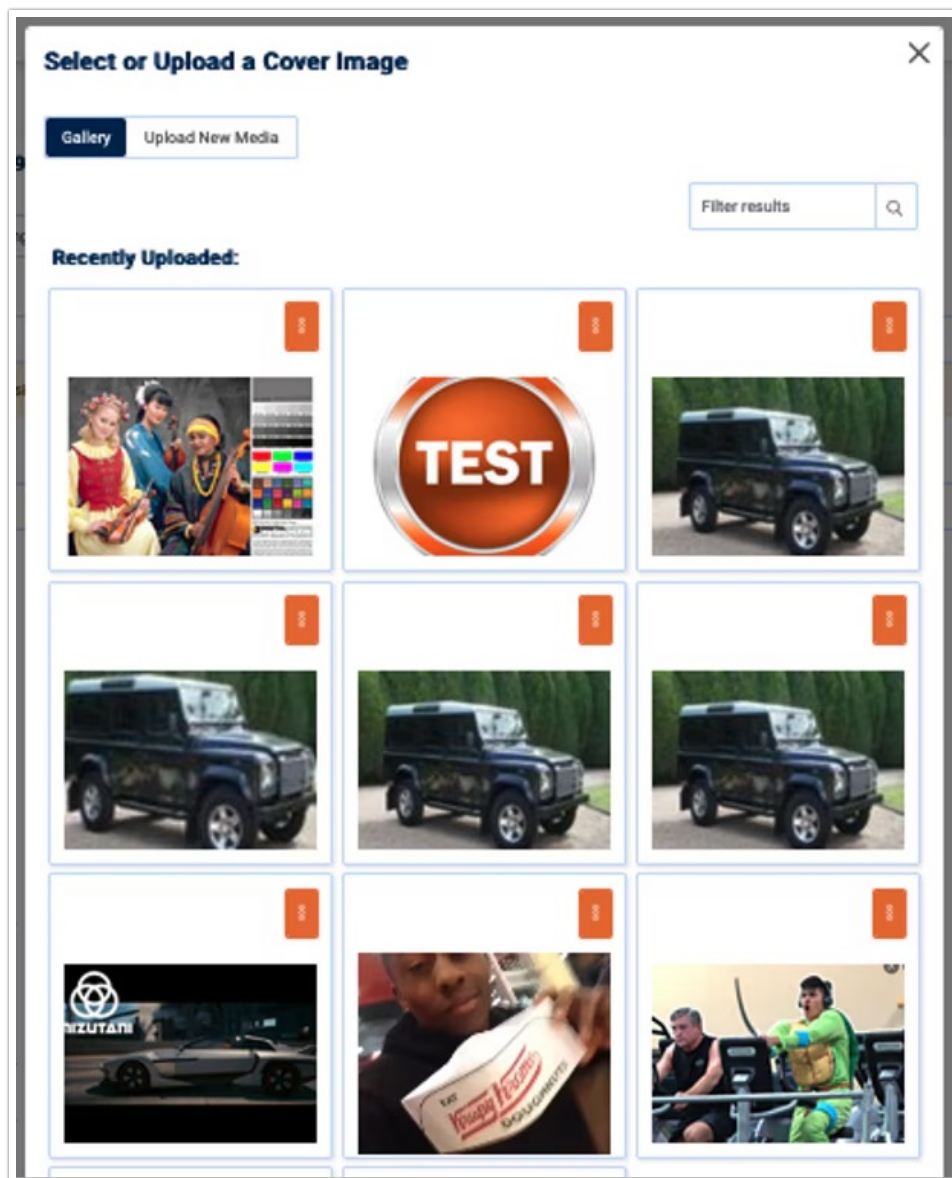

Chatmeter users who have delegated their company as a partner in Apple Business Connect can add or update cover and gallery images through LocationHQ. Note that you can't manage logos through LocationHQ.

To update a cover or gallery photo, follow these steps:

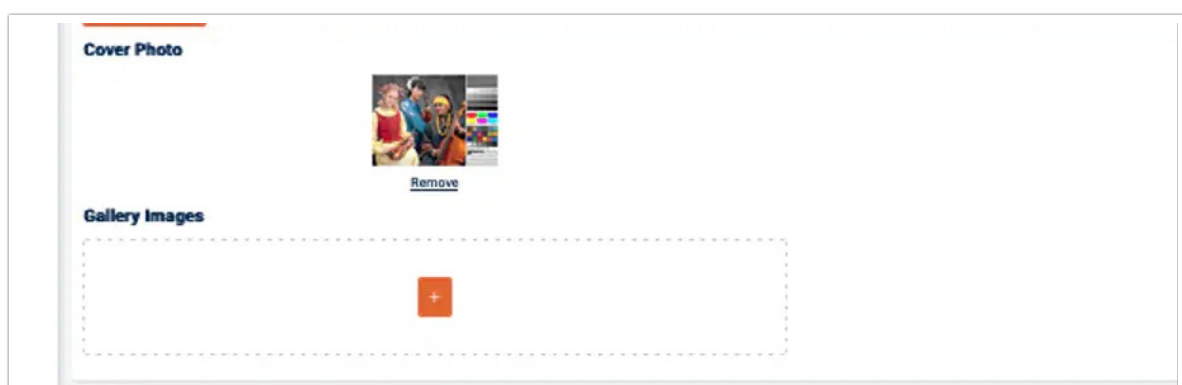

1. Login to your Chatmeter account in LocationHQ.
2. Select **Location > Locations** to display the **Locations** page.
3. On the **Locations** page, select the location for which you want to manage cover or gallery photos.
4. On the **Location Details** page, select the **Apple** tab.

5. Use the **Cover Photo** or **Gallery Images** fields to manage the photos. In this example, we're uploading an image to add to the **Gallery Images** by selecting the plus sign in the **Gallery Images** field. The **Select or Upload** dialog box appears.

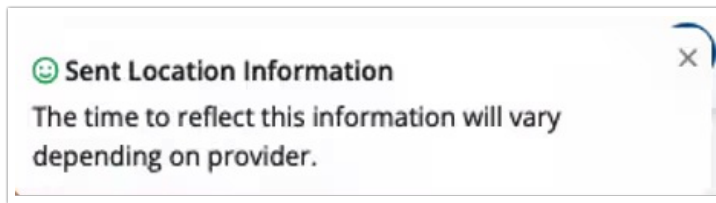

6. Select the photo you want to add from the **Gallery** tab, or select **Upload New Media** to upload an image from your computer or from another source. In this case, we select the coffee cup to add to the Apple Maps gallery. (See the section **Cover and Gallery image size requirements** for details on image requirements.)

Note that you'll see only the images that have been added to the Apple Maps listing through LocationHQ when you manage images in LocationHQ.

7. Select **Save**. You'll receive a notification of success.

Apple Maps Cover and Gallery image size requirements

Image size requirements for Apple Maps cover and gallery images are described in the tables that follow.

Table 1. Cover photo requirements

Minimum dimensions	Maximum length	Aspect ratio	File format
1600x1040	4864	1.54:1	JPEG or PNG

Table 2. Gallery image requirements

Minimum length	Maximum length	File format
Greater than 100	Less than 4864	JPEG or PNG

Notes on listing details needed for Apple Maps

Apple requires that phone number, business name, and address match the business location's website. If the information doesn't match on both the location's website and on Chatmeter, Apple might not update the information.

Apple requires latitude and longitude (Lat/Long) coordinates for locations. If you find a listing hasn't been published when expected, it might be because either the Lat/Long or Categories for the listing is missing.

Note that Chatmeter can't control the differences in appearance between Maps on iPhone and Maps on a desktop or through a search engine, which are attributable to the Apple design.
