Stripe Authentication

Overview

The Alchemer Stripe integration uses API Key authentication to authenticate.

Stripe API Credentials

What You Need
- Your Stripe Secret Key

How to Get Your Stripe API Credentials

1. Steps for creating/getting API credentials
   - Log in to your Stripe Dashboard.
   - Navigate to **Developers → API Keys**.
   - Under the **Standard Keys** section, locate your **Secret Key**.
   - If no Secret Key exists (rare), select **Create secret key**.
   - Copy the Secret Key for use inside Alchemer.

Authenticate Stripe in Alchemer

After obtaining your Stripe Secret Key, add it to the Alchemer Stripe integration. Credentials are securely stored in Alchemer and can be reused.

How to Authenticate

Your browser does not support HTML5 video.

1. Start a New Authentication
   - Inside any Stripe integration action, select **New Authentication**.

2. Enter Your Stripe Credentials
Provide the following:
   - Stripe Secret Key

3. Save Your Authentication
   - Select **Create**.
   - Once created:

- The authentication is saved and reused for all Stripe actions.
- You only need to update it if your API credentials change.
