Databricks

Databricks is a unified analytics and machine learning platform built on Apache Spark. Access your Databricks database to synchronize, update, and push structured tables for deep reporting and dynamic survey customization.

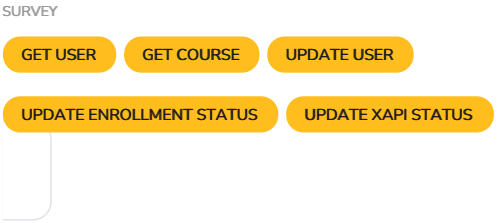

Displayr

Displayr is a data analysis and dashboarding platform for survey data. Send your Alchemer data to a shared data source, then connect Displayr to it to build live, automatically refreshing dashboards.

Docebo

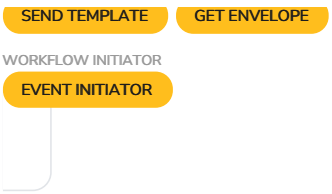

Docebo is a learning management platform for corporate training and development. Manage users, courses, and enrollment data directly from survey responses.

Docusign

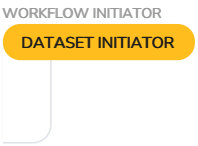

Docusign is a digital document signing and agreement management platform. Automate document signing workflows and retrieve envelope statuses.

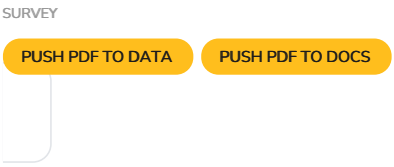

Domo

Domo is a cloud-based business intelligence and dashboarding platform. Connect survey data to your Domo dashboards via dataset alerts.

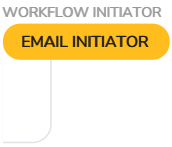

Dovetail

Dovetail is a research repository and AI-powered qualitative analysis platform. Push survey response PDFs directly into Dovetail data and docs for AI analysis.

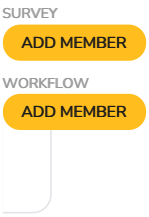

Email

Trigger workflows based on incoming emails, enabling automated processing, routing, or follow-up actions from email-driven events.

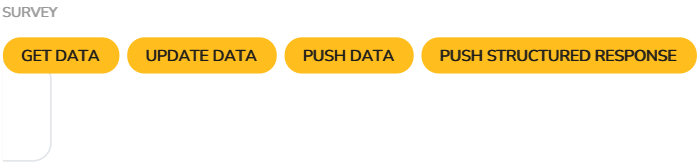

Emma

Emma is an email marketing platform for creating targeted campaigns and managing subscriber lists. Add members to your Emma audience directly from survey responses or workflow steps.

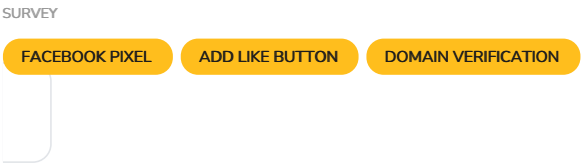

Excel

Excel is a spreadsheet and structured data tool used worldwide for analysis and reporting. Push, get, and update data in Excel using Alchemer survey data. Custom structured response integration also allows you to push tables with questions, responses, and survey instances.

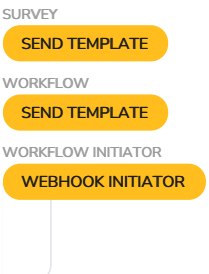

Facebook

Facebook tools help track engagement, verify ownership, and add social features to surveys. Add tracking pixels, enable social interactions, and confirm domain identity.

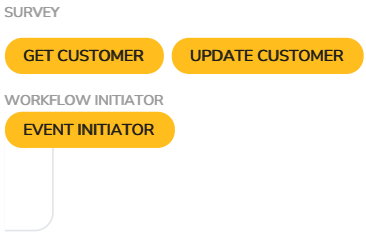

Foxit eSign

Foxit eSign is a digital document signing and agreement management platform. Automate sending documents out for signature directly from Alchemer surveys and workflows.

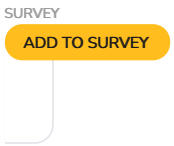

Gladly

Gladly is a customer service platform designed around people instead of tickets. Update customer data and retrieve details to fully customize your Alchemer surveys, or initiate workflows when conversations close.

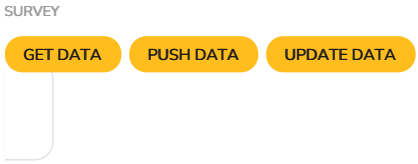

Google Analytics

Google Analytics tracks digital engagement. Add GA tracking to surveys to measure traffic, behavior, and conversion metrics.

Google Sheets

Google Sheets is a cloud-based spreadsheet and data collaboration tool. Push survey data directly to Google Sheets or retrieve data to pre-populate and customize your surveys.

Google Tag Manager

Google Tag Manager enables tag deployment without modifying code. Add GTM to surveys to track behavior, conversions, and analytics events.

WORKFLOW INITIATOR

Paylocity

Paylocity is a cloud-based HR and payroll system used for employee record management. Automate Alchemer workflows based on employee changes such as new hires or terminations.

PeopleSoft

PeopleSoft is an enterprise HR and financial management platform used across large organizations. Integrate enterprise HR and finance data using custom webhooks to fire Alchemer workflows when a data event occurs in PeopleSoft.

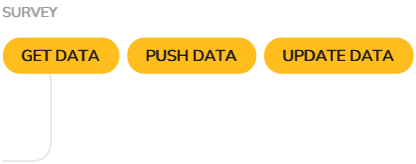

Power BI

Power BI is Microsoft's business intelligence and visualization platform for dashboards and reporting. Push survey data directly to Power BI datasets for real-time reporting.

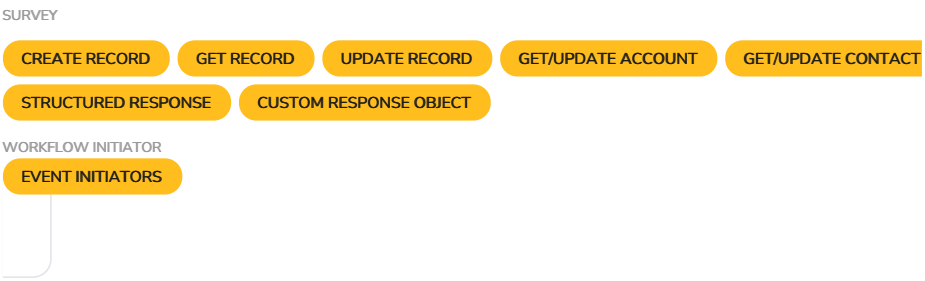

Redshift

Amazon Redshift is a cloud data warehouse used for analytics and BI workloads. Retrieve data or push survey responses to your Redshift tables for complete data synchronization.

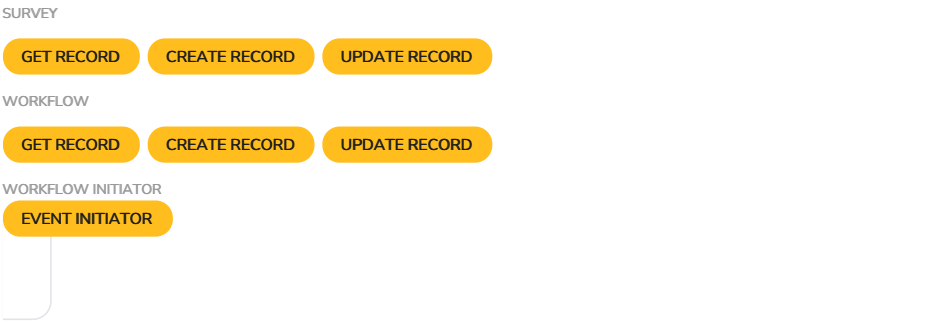

Salesforce

Salesforce is a leading CRM platform used for managing contacts, accounts, opportunities, and business workflows. Customize surveys with Salesforce record data or sync updated information back into Salesforce.

ServiceNow

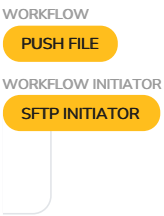

ServiceNow is an IT service management platform used for tickets, automation, and service workflows. Integrate with ITSM workflows using REST calls to sync ticket updates or trigger workflow actions.

SFTP

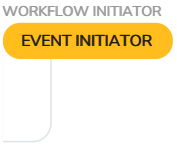

SFTP (Secure File Transfer Protocol) provides encrypted file transfer and storage. Monitor SFTP locations to trigger workflows and create files from survey data for secure, automated data delivery.

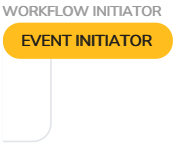

Shopify

Shopify is an e-commerce platform for online store operations, order management, and customer activity. Trigger surveys based on orders, fulfillments, or customer creation events.

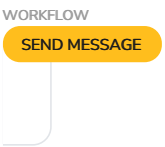

Slack

Slack is a workplace communication platform for real-time messaging, automations, and team alerts. Enhance team collaboration by triggering workflows via Slack slash commands.

SMS

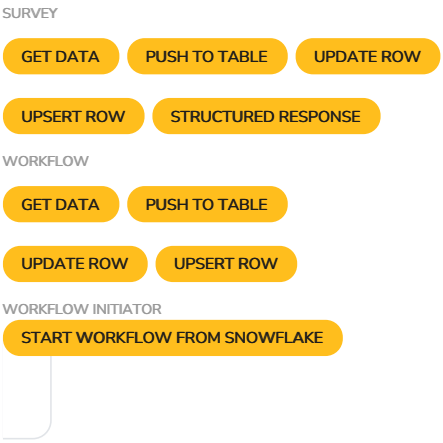

Automate outbound SMS messages from workflow steps, enabling notifications, alerts, and customer engagement via text.

Snowflake

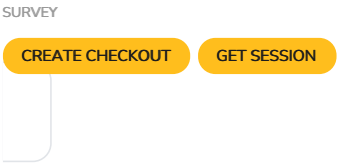

Snowflake is a cloud data warehouse designed for scalable analytics and secure data

sharing. Sync survey data with Snowflake or retrieve Snowflake data to enrich your surveys.

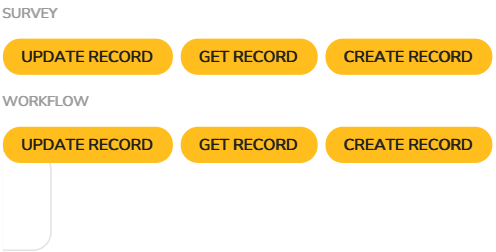

Stripe

Stripe is a payments platform for handling online transactions and checkout flows. Automate payments and retrieve checkout session details for seamless survey-driven commerce.

SugarCRM

SugarCRM is a customer relationship management platform for sales, marketing, and service teams. Create, update, and retrieve CRM records directly from survey responses or workflow steps.

Swoogo

Swoogo is an event management platform for planning and executing events. Retrieve

Swoogo is an event management platform for planning and executing events. Retrieve speaker details, registrant information, and event data to power survey and workflow automations.

Tableau

Tableau is a visual analytics platform for exploring and understanding data. Connect your Alchemer data directly to Tableau for powerful reporting and dashboards.

DATA CONNECTOR

Tango

Tango is a digital rewards platform that enables organizations to instantly send gift cards and incentives. Use the Tango integration to automatically reward respondents upon survey completion or workflow triggers.

SURVEY

SEND REWARD

Tremendous

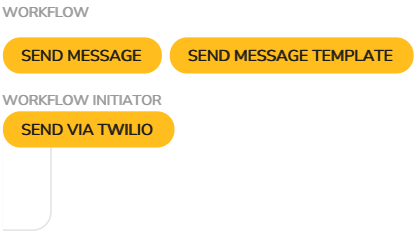

Tremendous is a global rewards and payouts platform. Distribute rewards through the Tremendous integration and send incentives when customers complete a survey to enhance completion rates.

SURVEY

SEND REWARD

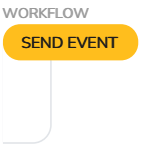

Twilio

Twilio is a cloud communications platform used to send SMS, voice, and other messaging. Send SMS messages via Twilio using custom webhooks and messaging services.

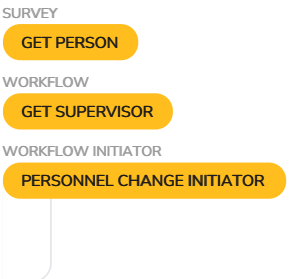

Twilio Segment

Twilio Segment is a customer data platform that collects, cleans, and routes data to hundreds of tools. Track events and manage user profiles by connecting Segment to your workflows.

UKG

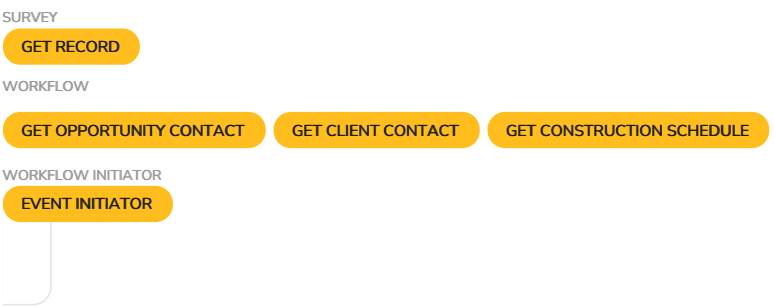

UKG is a leading human resources and workforce management platform. Automate HR feedback by retrieving personnel details or initiating surveys on personnel changes, customizing your surveys with person and supervisor data.

Unanet

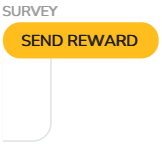

Unanet is a project management and CRM platform used for managing customers, contacts, and project workflows. Retrieve project and contact data or initiate surveys

directly from Unanet Workflows to personalize Alchemer surveys.

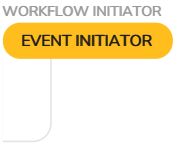

Virtual Incentives

Virtual Incentives is a digital rewards and gift card distribution platform. Automatically send incentives to survey participants to boost engagement and completion rates.

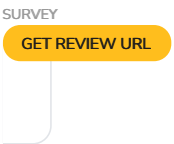

Workday

Workday is a widely used HR and financial management system. Integrate your HR system of record with Alchemer through Workday webhooks.

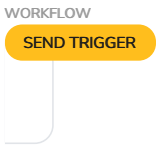

Yext

Yext is a platform for managing digital presence, including business listings and reviews. Retrieve review URLs to streamline brand reputation and customer feedback workflows.

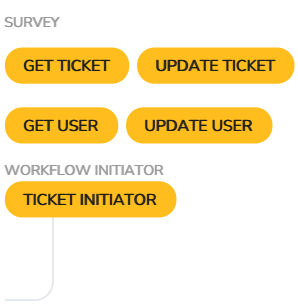

Zapier

Zapier connects apps through automated workflows. Use Alchemer workflows to send triggers into Zapier for downstream automations.

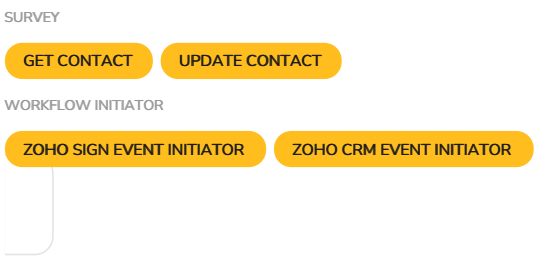

Zendesk

Zendesk is a customer support and ticketing platform. Create and update tickets, sync user data, and trigger workflows from ticket events to personalize Alchemer surveys with user and ticket details.

Zoho

Zoho is a suite of business applications including CRM and document signing. Retrieve and update Zoho CRM contacts or send Zoho Sign templates for signature.

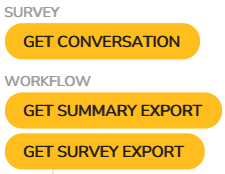

Alchemer AI

Use Alchemer AI to automatically generate intelligent follow-up questions based on respondent answers, helping you deepen insights and personalize survey experiences in real time.

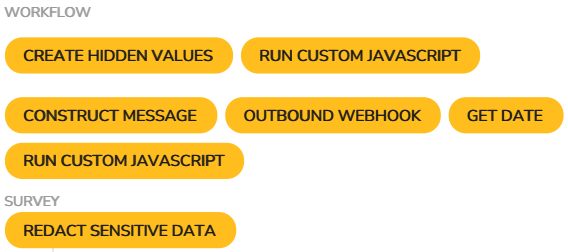

Alchemer Digital

Alchemer Digital captures digital experience data from your apps and sites. Use Get Conversation to pull detailed interaction histories into workflows and surveys for richer context and personalized experiences.

Alchemer Tools

Alchemer Tools are native workflow utilities that help you transform data, construct messages, call external systems, and redact sensitive information entirely within Alchemer.

Alchemer Pulse

Alchemer Pulse centralizes operational and experience data for advanced analytics. Use Push Data to send workflow outputs from Alchemer directly into Pulse for unified reporting and deeper insights.

Alchemer Survey

Alchemer Survey is Alchemer's own survey and data collection platform. Use the Alchemer Survey integration to look up, create, update, and upsert contacts in your Alchemer contact lists directly from surveys and workflows.
