The Alchemer Airtable Integration is available as an add-on and only available to customers in enterprise plans. If you are interested in purchasing the Airtable Integration, please [contact us](#) for additional information.

With the Alchemer Airtable integration you can easily:

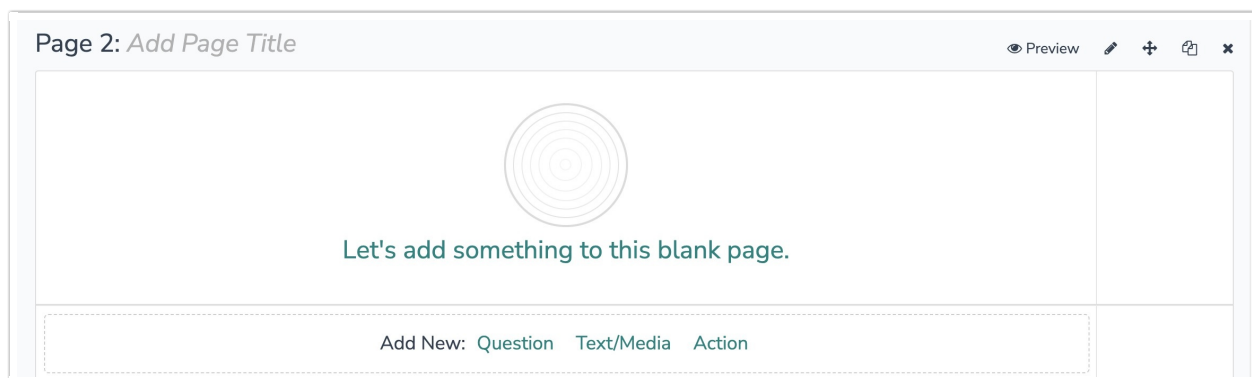

- Push survey data from Alchemer into an Airtable table.
- Pull data from Airtable and use that data in an Alchemer Survey.
- Update an Airtable record with data from an Alchemer Survey

Integration Setup

Adding an Integration Action

1. Select an existing survey or create a new survey. Then navigate to the Survey Builder.
2. Click "Add New: Action"

You cannot add this Integration Action to the first page of the survey.

3. In the Add Action modal, scroll down to Integrations. Then click "Add" for your Airtable integration.

Airtable | Push Data to Airtable

Your browser does not support HTML5 video.

Before configuring this integration action, you will need:

- Your Airtable login credentials
- Fields in the survey that contain the data you want to push to Airtable.

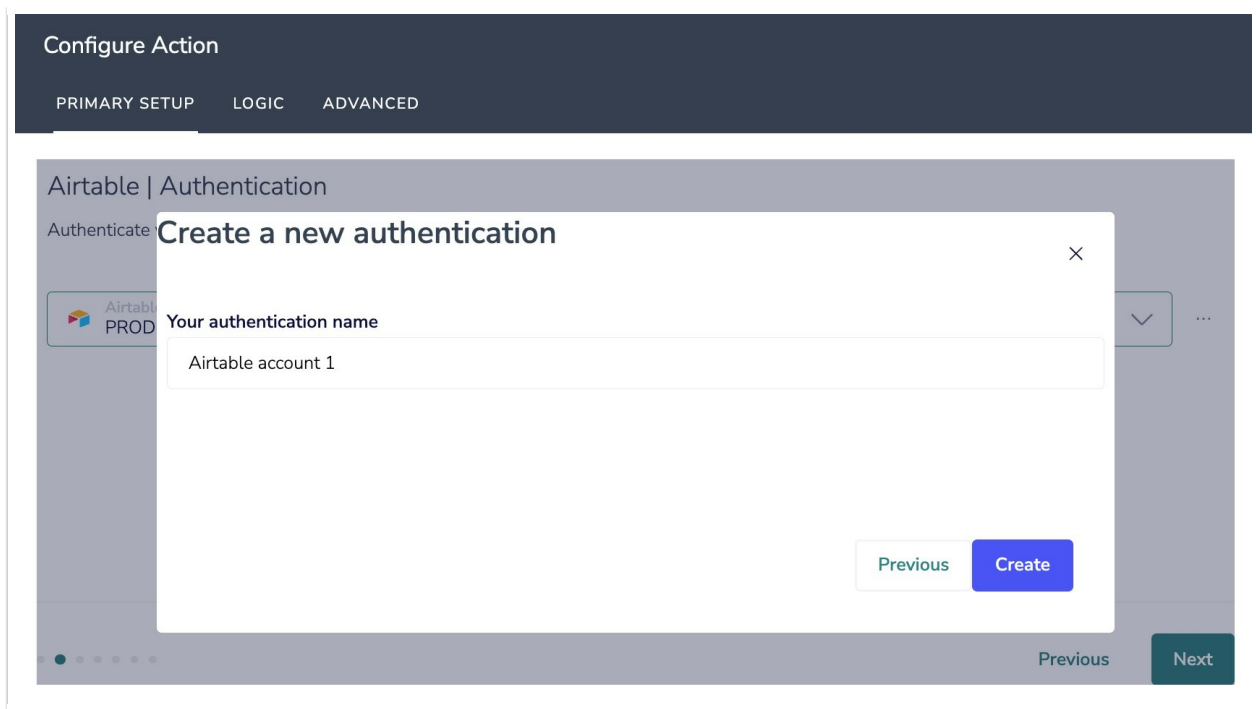

1. Click "Next" on the integration overview screen.

The screenshot shows the 'Configure Action' interface for the 'Airtable | Push data to Airtable' integration. At the top, there is a dark header with the title 'Configure Action' and three tabs: 'PRIMARY SETUP', 'LOGIC', and 'ADVANCED'. Below the header, the title 'Airtable | Push data to Airtable' is displayed, followed by the description 'Pushes data to a new record in Airtable.' A section titled 'You will need:' contains two bullet points: 'To login to Airtable' and 'Fields in this survey that contain the data you want to push to Airtable'. Below this, there is a link 'Need help? [Learn more](#)' and the version number 'v241024'. At the bottom right, there are 'Previous' and 'Next' buttons, with 'Next' being highlighted in green. A progress indicator with five dots is visible at the bottom left.

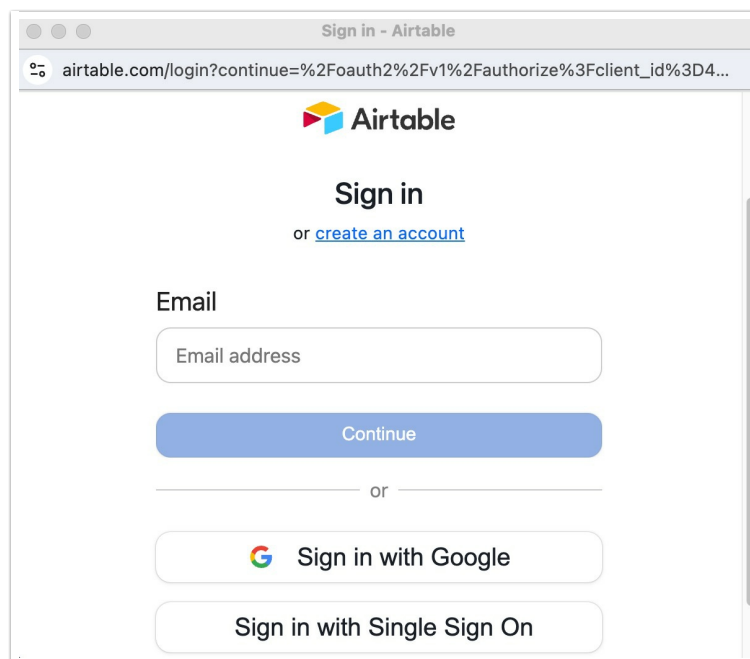

2. Click "Add a new account"

The screenshot shows the 'Configure Action' interface for the 'Airtable | Authentication' integration. At the top, there is a dark header with the title 'Configure Action' and three tabs: 'PRIMARY SETUP', 'LOGIC', and 'ADVANCED'. Below the header, the title 'Airtable | Authentication' is displayed, followed by the description 'Authenticate with Airtable'. A search bar contains the text 'PRODUCTION/ACTIVITY/123456789 Airtable account'. Below the search bar, there is a button labeled 'Add a new account'. At the bottom right, there are 'Previous' and 'Next' buttons, with 'Next' being highlighted in green. A progress indicator with five dots is visible at the bottom left.

3. Name your new authentication and click "Create".

4. In the window that appears, sign into your Airtable account.

After signing in you will need to grant Alchemer (Tray.io) access to selected bases and workspaces (or all current and future bases and workspaces) in Airtable

5. Return to the integration set-up screen in Alchemer and click "Next".

6. Select the Airtable base you want to push data into.

You will only be able to select bases that you have access to in Airtable.

Airtable | Update Airtable Record

Your browser does not support HTML5 video.

Before configuring this integration action, you will need:

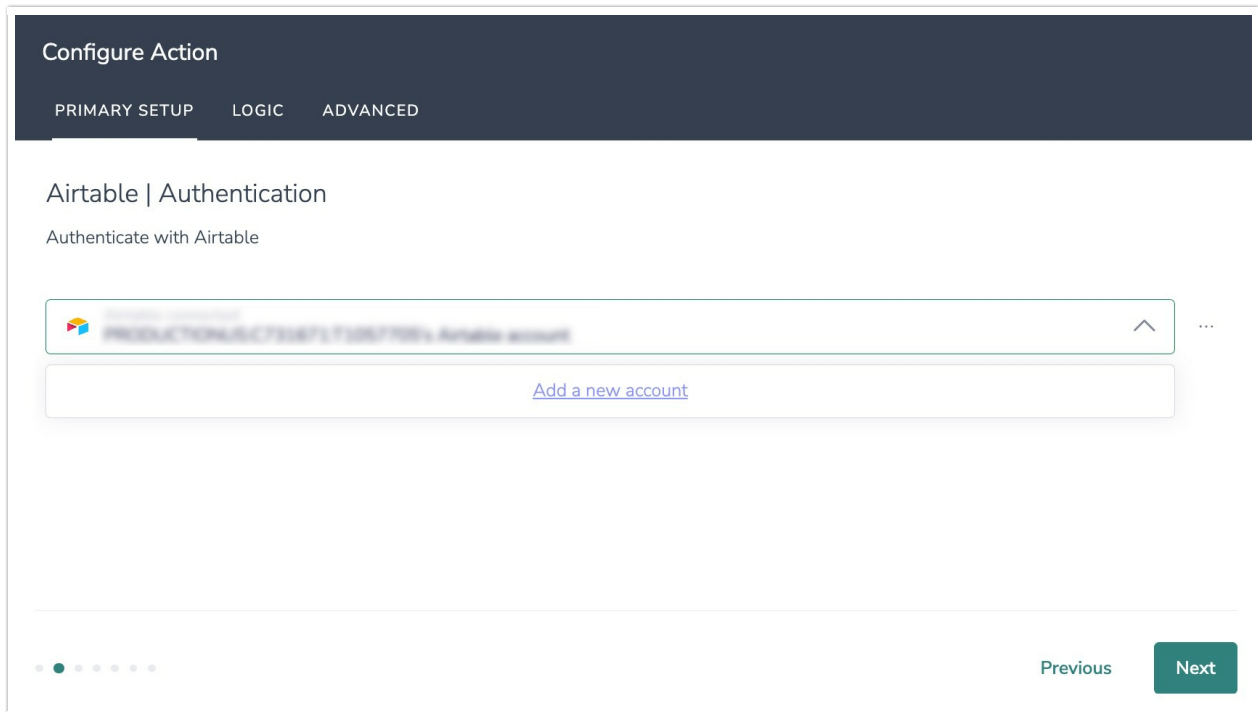

-
- To login to Airtable
- Fields in this survey that contain information to find the Airtable record to update
- Fields in this survey that contain the data you want to push to Airtable

1. Click "Next" on the integration overview screen.

The screenshot shows the 'Configure Action' interface with the 'PRIMARY SETUP' tab selected. The title 'Configure Action' is at the top. Below the tabs, the text 'You will need:' is followed by a bulleted list: 'To login to Airtable', 'Fields in this survey that contain information to find the Airtable record to update', and 'Fields in this survey that contain the data you want to push to Airtable'. A link 'Need help? Learn more' is present, along with the version number 'v241120'. At the bottom right, there are 'Previous' and 'Next' buttons, with 'Next' being highlighted in green. A progress indicator with seven dots is at the bottom left.

2. Click "Add a new account"

The screenshot shows the 'Configure Action' interface at the 'Airtable | Authentication' step. The title 'Airtable | Authentication' is at the top, with the subtitle 'Authenticate with Airtable'. Below this is a dropdown menu showing a selected Airtable account: 'PRODUCTION/ACT7587511257705's Airtable account'. Below the dropdown is a button labeled 'Add a new account'. At the bottom right, there are 'Previous' and 'Next' buttons, with 'Next' being highlighted in green. A progress indicator with seven dots is at the bottom left.

3. Name your new authentication and click "Create".

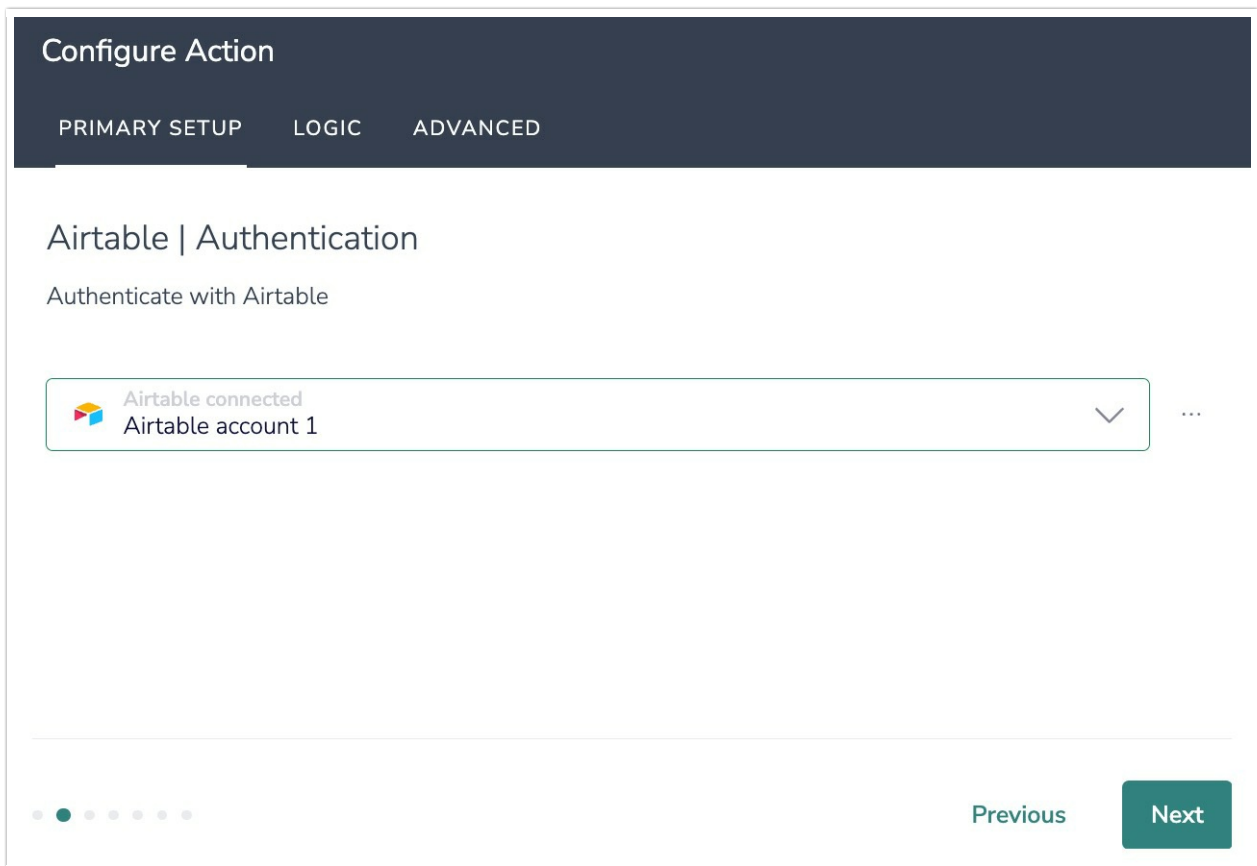

4. In the window that appears, sign into your Airtable account.

After signing in you will need to grant Alchemer (Tray.io) access to selected bases and workspaces (or all current and future bases and workspaces) in Airtable

5. Return to the integration set-up screen in Alchemer and click "Next".
