

Passare Authentication

Overview

The Alchemer Passare integration uses an API Token to authenticate.

Passare API Credentials

What You Need

- An API Token (your API Key from Passare)
-

How to Get Your Passare API Credentials

1. Request API Access from Passare

- Passare's API is not enabled by default. Visit <https://www.passare.com/api> and fill out the request form to request API access and an API Key.
- Once your request is approved, Passare will issue you an API Key. This is your API Token.

Need more help? Read Passare's overview of their public API here: [What is a Public API](#).

Authenticate Passare in Alchemer

After obtaining your Passare API Token, add it to the Alchemer Passare integration. Credentials are securely stored in Alchemer and can be reused.

How to Authenticate

Your browser does not support HTML5 video.

1. Start a New Authentication

- Inside any Passare integration action, select **New Authentication**.

2. Enter Your Passare Credentials

Provide the following:

- **API Token:** Your API Key from Passare

3. Save Your Authentication

- Select **Create**.
- Once created:
 - The authentication is saved and reused for all Passare actions
 - You only need to update it if your API Token changes
