Zapier

Alchemer Voice has a Zapier app, so your Alchemer Voice data can trigger or feed Zaps. The Zapier card in Alchemer Voice opens Zapier's invitation page. You accept it, add the app to your Zapier account, and approve access when Zapier asks you to sign in to Alchemer Voice.

Before you begin

- Alchemer Voice Admin privileges.
- A Zapier account.

Add the app

1. Go to **Admin > Connections** and scroll to **Data services**.
2. On the Zapier card, click **Connect**.
3. In Zapier, accept the invite and add the Four/Four app. The app appears in Zapier under the name Four/Four.
4. When Zapier asks you to connect your account, sign in to Alchemer Voice and click **Authorize**.

Manage access

Zapier connections are listed under **Admin > Connections > Access tokens > Third-party connections**. To disconnect Zapier, revoke its entry there.

Use webhooks with Zapier

A webhook can call a Zapier "Catch Hook" URL when a conversation finishes processing. See the Webhooks article for details.

If you need help, contact Alchemer Support.
