Google Meet

To analyze Google Meet conversations in Alchemer Voice, upload your Meet recordings to Alchemer Voice. Alchemer Voice creates a transcript from the video if you don't have one.

Upload a Meet recording

Before you begin

- A Google Meet recording saved where you can access it.
- Permission to upload conversations in Alchemer Voice. See Roles and permissions.

Steps

1. In Alchemer Voice, go to **Conversations** and click **Upload**.

2. Drag the video onto the upload area.

Alchemer Voice creates a draft conversation and opens it. If you have no transcript, Alchemer Voice creates one from the video. For more on uploading, see Uploading a recording or transcript.

Permissions

Uploading a recording requires permission to upload conversations. See Roles and permissions.

If you need help, contact Alchemer Support.
